ACKNOWLEDGEMENT

The author would like to express her profound gratitude to her supervisor, Dr. Methi Ekasingh, for his invaluable guidance, encouragement and stimulating suggestions in the whole process of the study that enabled her to complete this thesis.

Deepest appreciation, gratitude and respect are also due to her committee members, Mrs. Amapan Bhromsiri, Mr. Phrek Gypmantasiri and Dr. Aree Wiboonpongse, for their valuable advice and constructive criticisms which had made her thesis more readable and sensible.

It is also a pleasure to acknowledge the help of Mr. Prachaya Dhanyadee, Dr. Pitayakorn Limtong, Miss Siangjeaw Piriyaaprin, Miss Chaveevan Leungvuitivirog, Miss Suporn Amaruekachoke, Mr. Zhang Rentian, Mr. Nguyen Ngoc De and Miss Ellen R. Pontollana for their keen interest and worthy suggestions which were constant sources of encouragement for the author.

Thanks are also extended to Mr. Sithichai and Mrs. Kanjanaporn Lodkaew and Mr. Jamlong Pothachareon for their help in the laboratory work and field experiment, and to the staff of Multiple Cropping Center for their co-operation during the study.

This research can not be conducted without financial support. So, her special gratitude are also given to her donor, the Ford Foundation.

Finally, her special thanks go to her parents, Mr. Manas and Mrs. Thongon Wassananukul and her friends, Miss Apiradee Komolsiri and Miss Konchanok Supradit Na Ayutthaya. Their encouragement and advice were valuable to her study.

Wawta Wassananukul
