ACKNOWLEDGEMENT.....	i
ABSTRACT.....	iv
TABLE OF CONTENT.....	viii
LIST OF TABLES.....	xii
LIST OF FIGURES.....	xiii
I. INTRODUCTION.....	1
I.1. BACKGROUND OF THE STUDY.....	1
I.2. RATIONALE.....	5
I.3. OBJECTIVES OF THE STUDY.....	6
II. SHIFTING CULTIVATION SYSTEM.....	8
II.1. GENERAL DEFINITION OF SHIFTING CULTIVATION.....	8
II.2. CLASSIFICATION OF SHIFTING CULTIVATION.....	9
II.3. DISTRIBUTION OF SHIFTING CULTIVATION.....	13
II.4. SOIL FERTILITY IN SHIFTING CULTIVATION.....	14
II.5. SUSTAINABILITY AND POPULATION PRESSURE.....	19
II.5.1. SUSTAINABILITY OF SHIFTING CULTIVATION.....	19
II.5.2. POPULATION PRESSURE.....	23
II.5.3. USING SYSTEM MODELING IN SHIFTING CULTIVATION.....	26
III. METHOD OF STUDY.....	30
III.1. MODELING APPROACH.....	30
III.2. THE BADUY SHIFTING CULTIVATION MODEL.....	31

III.2.1. SCENARIOS OF SHIFTING CULTIVATION.....	31
III.2.2. HYPOTHESES.....	33
III.2.3. THE GOAL AND BOUNDARIES WITHIN THE SYSTEM.....	34
III.2.4. CAUSAL LOOP DIAGRAM.....	35
III.2.5. TRANSLATION OF CAUSAL LOOP DIAGRAM INTO FLOW CHART.....	37
III.3. MAIN SECTOR OF THE MODEL.....	39
III.3.1. HUMAN POPULATION SECTOR.....	39
III.3.2. FOOD SECTOR.....	41
A). AGRICULTURAL PRODUCTION.....	42
B). FOOD CONSUMPTION.....	45
III.3.3. LAND USE SECTOR.....	45
III.3.4. SOIL FERTILITY SECTOR.....	47
IV. SUPPORTING DATA FOR THE MODEL.....	49
IV.1. DATA COLLECTION.....	49
IV.2. THE BADUY SOCIETY.....	50
IV.2.1. GEOGRAPHY.....	50
IV.2.2. ALTITUDE.....	51
IV.2.3. SOIL TYPE.....	53
IV.2.4. RAINFALL.....	53
IV.2.5. ADMINISTRATION.....	54
IV.2.6. PEOPLE AND POPULATION.....	56
IV.2.7. RELIGION.....	58
IV.2.8. SUBSISTENCE OF THE PEOPLE.....	58

IV.2.9. LAND USE AND CROPPING	
SYSTEMS.....	59
IV.3. DATA USED IN THE MODEL.....	68
IV.3.1. DEMOGRAPHY.....	68
IV.3.2. LAND USE SYSTEM.....	68
IV.3.3. AGRICULTURAL PRODUCTION.....	69
IV.3.4. FOOD CONSUMPTION.....	70
IV.4. MODEL INITIALS.....	72
V. RESULTS OF ANALYSIS AND DISCUSSION.....	75
V.1. RESULT OF THE BASE RUN.....	75
V.1.1. POPULATION SECTOR.....	75
V.1.2. FOOD SECTOR.....	79
V.1.2.1. FOOD IN BADUY AREA.....	79
V.1.2.2. FOOD SURPLUS.....	82
V.1.2.3. PLUS2 AND OFF-FARM.....	83
V.1.2.4. FOOD SUPPLY IN NON BADUY	
AREA.....	85
V.1.3. LAND USE SECTOR.....	86
V.1.4. SOIL FERTILITY SECTOR.....	91
V.2. TEST OF HYPOTHESES.....	93
V.2.1. THE FIRST AND THIRD HYPOTHESES.....	93
V.3. ALTERNATIVE RUNS.....	97
V.3.1. THE SECOND AND FOURTH HYPOTHESES.....	97
V.3.1.1. RESTRICTED POPULATION	
GROWTH.....	98

V.3.1.2. IMPROVEMENT IN SOIL FERTILITY.....	99
V.3.1.3. NO RELATIONSHIP BETWEEN FOOD AND POPULATION.....	105
V.4. POLICY ANALYSIS.....	108
VI. CONCLUSION AND CONTRIBUTION OF THE STUDY.....	122
VI.1. CONCLUSION.....	122
VI.2. CONTRIBUTION OF STUDY.....	127
REFERENCES.....	130
APPENDIXES	
1. NOMENCLATURE.....	134
2. EQUATIONS OF THE MODEL.....	138
3. THE VARIABLE DESCRIPTION USED IN MODEL.....	146
4. BASE RUN DATA OF THE SIMULATION OF BADUY'S SHIFTING CULTIVATION MODEL, WEST JAVA, INDONESIA.....	148
5. ALTERNATIVE RUN: BRF=0.20.....	149
6. ALTERNATIVE RUN: XI=X2=X3=X4=0.....	150
7. ALTERNATIVE RUN: SFRT1=1.31 x SFRT0.....	151
8. ALTERNATIVE RUN: MOF=0.....	152
9. ALTERNATIVE RUN:MIF=0.....	153
CURRICULUM VITAE.....	154

LIST OF TABLES	PAGE
1. A GENERAL DESCRIPTION OF BADUY AREA.....	2
2. SOME LOCAL VERNACULAR TERMS USED FOR SHIFTING CULTIVATION IN DIFFERENT PARTS OF THE WORLD.....	10
3. CLASSIFICATION OF SHIFTING CULTIVATION BASED ON LAND USE SECTOR.....	12
4. MEAN ANNUAL INCREASES OF NUTRIENT STORAGE IN FALLOW VEGETATION (KG/HA).....	17
5. EFFECT OF FALLOW IN SHIFTING CULTIVATION.....	17
6. UPTAKE OF MINERAL NUTRIENTS BY MAIZE PLANT AND UNFERTILIZED SOIL IN NAMPHROM THAILAND.....	18
7. EROSION IN VARIOUS TROPICAL FOREST AND TREE CROP SYSTEM (TON/HA/YEAR).....	18
8. POPULATION OF BADUY IN 1888 TO 1986	57
9. LAND USE TYPE IN BADUY, WEST JAVA.....	69
10. AGRICULTURAL PRODUCTION IN BADUY.....	70
11. AVERAGE FOOD CONSUMPTION OF BADUY PEOPLE IN A DAY/HOUSEHOLD.....	71
12. INITIAL PARAMETER VALUES USED IN BASE RUN OF BADUY'S SHIFTING CULTIVATION.....	72
13. INITIAL PARAMETER VALUE USED IN ALTERNATIVE RUNS OF BADUY'S SHIFTING CULTIVATION.....	74

LIST OF FIGURES	PAGE
1. MAP OF BADUY AREA, WEST JAVA, INDONESIA.....	4
2. DISTRIBUTION OF SHIFTING CULTIVATION IN THE TROPICS.....	14
3. A SIMPLIFIED FOREST SOIL NUTRIENT CYCLE.....	15
4. THE PRINCIPAL CAUSAL LOOPS OF SHIFTING CULTIVATION SIMULATION MODEL OF BADUY, WEST JAVA, INDONESIA...	36
5. FLOW CHART OF SHIFTING CULTIVATION MODEL IN BADUY, WEST JAVA, INDONESIA.....	38
6. AVERAGE ALTITUDE OF BADUY AREA.....	52
7. AVERAGE RAIN FALL IN BADUY AND ADJACENT AREA IN 1960-1980.....	54
8. ZONATION SYSTEM IN BADUY AREA, WEST JAVA, INDONESIA.....	61
9. CROPPING CALENDAR OF BADUY'S SHIFTING CULTIVATION OF WEST JAVA, INDONESIA.....	66
10. DEVELOPMENT LAND USE SYSTEM IN BADUY, WEST JAVA, INDONESIA.....	67
11. POPULATION IN BADUY IN BASE RUN SIMULATION... ..	77
12. BIRTH AND DEATH RATE IN BADUY POPULATION IN BASE RUN SIMULATION.....	78
13. IN-MIGRATION AND OUT-MIGRATION RATE OF BADUY IN BASE RUN SIMULATION.....	79
14. FOOD IN BADUY IN BASE RUN SIMULATION.....	81
15. SURPLUS1 AND FOOD CONSUMPTION (RUPIAH) OF BADUY IN BASE RUN SIMULATION.....	83

16. PLUS2 AND AGRICULTURAL PRODUCTION (RUPIAH) IN BADUY IN BASE RUN SIMULATION.....	84
17. FOOD CONSUMPTION AND OFF-FARM INCOME (RUPIAH) IN BADUY IN BASE RUN SIMULATION.....	85
18. FOOD SUPPLY (RUPIAH) IN NON BADUY AREA AND OUT-MIGRATION (PEOPLE) OF BADUY PEOPLE IN BASE RUN SIMULATION.....	86
19. LAND USE SYSTEMS (HA) IN BADUY IN BASE RUN SIMULATION.....	90
20. SOIL FERTILITY IN BADUY IN BASE RUN SIMULATION.....	92
21. FOOD CONSUMPTION AND FOOD LEVEL (RUPIAH) IN BADUY IN BASE RUN SIMULATION.....	94
22. FOREST AREA (REUMA) IN BADUY IN BASE RUN SIMULATION.....	95
23. POPULATION AND FOOD SUPPLY (RUPIAH) IN BADUY WITH THE BIRTH RATE OF 2.0 PER CENT PER ANNUM....	99
24. SOIL FERTILITY OF BADUY BY SIMULATION INCREMENT OF $SFRT1=1.31 \times SFRT0$	101
25. FOOD, POPULATION, MIXED GARDEN AREA (MXGDA) AND 4 YEARS REUMA AREA RMA4) OF BADUY WITH 31 PER CENT INCREMENT SOIL FERTILITY AFTER 1 YEAR FALLOW ($SFRT1=1.31*SFRT0$).....	101

26.	SOIL FERTILITY OF BADUY WITH 24 PER CENT INCREMENT OF SOIL FERTILITY IN SECOND YEAR FALLOW (SFRT2=1.24*SFRT1) AND 25 PER CENT INCREMENT IN THE FIRST YEAR FALLOW (SFRT1=1.25*SFRT0).....	103
27.	FOOD, POPULATION AND FOOD CONSUMPTION OF BADUY WITH INCREMENT OF SFRT2=1.24 x SFRT1 AND SFRT1=1.25 x SFRT0.....	103
28.	POPULATION OF BADUY BY USING SIMULATION X1=X2=X3=X4=0.....	107
29.	FOOD, FOOD CONSUMPTION, AND TOTAL AGRICULTURAL PRODUCTION BY SIMULATION X1=X2=X3=X4=0.....	107
30.	POPULATION, REUMA, AND LADANG ARE BY SIMULATION X1=X2=X3=X4=0.....	108
31.	POPULATION, FOOD CONSUMPTION AND FOOD LEVEL OF BADUY WITH OUT-MIGRATION (MOF)=0.....	112
32.	POPULATION, FOOD CONSUMPTION AND FOOD LEVEL OF BADUY WITH IN-MIGRATION (MIF)=0.....	112
