ACKNOWLEDGEMENT	i
ABSTRACT	iii
TABLE OF CONTENTS	viii
LIST OF TABLES	xi
LIST OF FIGURES	xiii
I. INTRODUCTION.....	1
I.1 Statement of Problem	1
I.1.1 Shifting cultivation	1
I.1.2 Opium poppy growing	4
I.2 Rationale	8
I.3 Objectives of the Study	11
I.4 Usefulness of the Study	11
I.5 Literature Review	12
II. RESEARCH METHODOLOGY	19
II.1 Model Formulation	19
II.1.1 General Model	19
II.1.2 The objective function	20
II.1.3 Activities	21
II.1.3.1 Crop activities	21
II.1.3.2 Wage labor activity	22
II.1.3.3 Labor hiring activity ..	22
II.1.3.4 Capital borrowing	
activity (credit)	22
II.1.3.5 Capital transfer activity	23
II.1.3.6 Household expenditure	
activity	23
II.1.4 Constraints	23
II.1.4.1 Land constraint	23
II.1.4.2 Labor constraint	24
II.1.4.3 Family expenditure	25
II.2 Data Collection And Processing	27

	PAGE
III. BACKGROUND, PRODUCTION AND CONSUMPTION	30
III.1 Physical and Socio-economic Background ..	30
III.1.1 Location	30
III.1.2 Physical environment characteristics	30
III.1.3 The historical background	33
III.1.4 Socio-economic status of the village	34
III.2 Production	34
III.2.1 Classification of farmers, land use and cropping systems in the study area	34
III.2.2 Income and labor profile	38
III.2.3 Farm production and return	41
III.3. Family expenditure	44
IV. OPTIMUM FARM PLANS	47
IV.1 Initial Optimal Plan (IOP)	47
IV.2 Sensitivity Analysis	54
IV.2.1 Changes in the price of rice	55
IV.2.2 Changes in the price of corn	58
IV.2.3 Changes in the price of tea	60
IV.2.4 Changes in the price of coffee.....	62
IV.2.5 Changes in the price of lychee.....	66
IV.2.6 Changes in wage rate	69
IV.2.7 Changes in credit interest rate ..	72
IV.2.8 Changes in discounted rate	72
IV.2.9 Changes in labor wage demand	74
IV.2.10 Minimum allocation of land for rice consumption	82
V. CONCLUSION	90
REFERENCES	97
APPENDICES	103
1. Labor availability per family during peak season	103
2. Labor availability per family during off-season	104
3. Yield, labor used, cost and gross income for coffee per rai	105
4. Yield, labor used, cost and gross income for tea per rai	106

	PAGE
5. Yield, labor used, cost and gross income for lychee per rai	107
6. Estimation of expenditure equation	108
7. Basic needs (BNS) per family for each group of farmers	110
CURRICULUM VITAE	111

LIST OF TABLES

	PAGE
1. Area and production of opium poppy 1965 - 1983	7
2. Adult equivalent index for weighing family members related to food consumption	26
3. Meteorology data of Huai Tadd village for 1956 - 1985	32
4. Farm grouping	35
5. Total area of crops grown at Huai Tadd village 1990	36
6. The composition of family income for each group ..	39
7. Labor profile and utilization for each group	40
8. Yield, labor used, and gross income per rai of rice and corn	42
9. The average family expenditure for each group, in 1990	44
10. The simplified structure of Multi-period Linear Programming Model	48
11. Production plans for the first five year (rai) ...	49
12. Wage income for each group for the first five years	51
13. Total net present value of income, nominal income, expenditure and cash money at the end of plans ...	53
14. Estimation of expenditure equation at rice prices 5.50, 6.00 and 6.50 baht/kg	55
15. The summary effects of changes in price of rice on cropping patterns of groups 5, 9, and 11	56
16. The summary effects of changes in price of rice on NPVI, farm, and wage income, expenditure and cash money of groups 5, 9, and 11 (baht)	57
17. The summary effects of changes in price of corn on cropping patterns of groups 5, 9, and 11	58

18. The summary effects of changes in price of corn on NPVI, farm and wage income, expenditure, and cash money of groups 5, 9 and 11 (baht)	59
19. The summary effects of change in price of tea on cropping patterns of groups 11, 19 and 22	61
20. The summary effects of change in price of tea on NPVI, farm and wage income, expenditure and cash money of groups 11, 19 and 22 (baht)	62
21. The summary effects of changes in price of coffee on cropping patterns of all groups	63
22. The summary effects of changes in price of coffee on NPVI, farm and wage income, expenditure and cash money of selected groups (baht)	65
23. The summary effects of changes in price of lychee on NPVI, farm and wage income, expenditure and cash money of all groups (baht)	67
24. The summary effects of changes in wage rate on NPVI, farm and wage income, expenditure and cash money of all groups (baht)	70
25. The summary effects of changes in discounted factors on NPVI of all groups (baht)	73
26. The summary effects of decreasing in labor demand to 80.00, 60.00 and 40 percent on cropping patterns (all groups)	76
27. The summary effects of changes in labor demand on NPVI, farm and wage income, expenditure and cash money of all groups (baht)	79
28. Amount of credit borrowed by certain groups at labor demand 60.00 and 40.00 percent	81
29. The summary effects of allocating minimum land for rice for consumption on cropping patterns (all groups)	83
30. The summary effects of allocating minimum land for rice consumption on NPVI, farm and wage income, expenditure and cash money of all groups (baht) ...	85
31. The summary of sensitivity analyses	88

LIST OF FIGURES

	PAGE
1. Map of opium poppy areas in Chiang Mai	6
2. Location of study area	31
