ACKNOWLEDGEMENT	i
ABSTRACT	iii
TABLE OF CONTENTS	viii
LIST OF TABLES	xi
LIST OF FIGURES	xiv
APPENDIX TABLES	xv
CHAPTER 1. INTRODUCTION	1
1.1 Government Policies	3
1.1.1 Rice Policy	3
1.1.2 Rice Policy and Adoption of New Technology	4
1.1.3 Fertilizer Policy	5
1.2 High Quality Rice of Thailand	7
1.2.1 Meaning and Importance	7
1.2.2 Khao Dawk Mali: The Thai High Quality Rice	8
1.2.3 Share of Thai High Quality Rice in World Market	10
1.3 Rationale	13
1.3.1 Demand Studies for Rice in Thailand	14
1.4 Objectives	15
1.5 Literature Review	16
1.5.1 Estimation Methods	16
1.5.2 Estimation Utilizing Meta-Production Function Approach	18
CHAPTER 2. METHODOLOGY	21
2.1 The Meta-Production Function	21
2.2 Scope and Limitation	24
2.3 Data Collection	24
2.4 Data Collected	25
2.5 Specification of the Model	26
2.6 Estimation	29
2.7 Input Demand Elasticities	32
2.8 Output Supply Elasticities	34

	Page
2.9 Input Demand Elasticities After Allowing for Seed Switching	36
CHAPTER 3. PRODUCTION ENVIRONMENT IN THE STUDY AREA	38
3.1 The Production Environment	38
3.1.1 Cropping Systems	40
3.2 Agro-economic Characteristics of the Sample Villages	41
3.3 General Socio-economic Information of the Sample Farms	43
3.3.1 Family Size	43
3.3.2 Land Ownership and Tenancy	43
3.3.3 Input and Output Prices	45
3.3.4 Farming Experience	45
3.3.5 Farm and Household Assets	46
3.4 Economics of Rice Cultivation	47
3.4.1 Yields	47
3.4.2 Material Inputs	49
3.4.2.1 Seeds	49
3.4.2.2 Fertilizer and Pesticides	49
3.4.2.3 Irrigation	51
3.4.3 Labor	51
3.5 Average Cost and Profitability	54
3.6 Highlights	58
CHAPTER 4. DECISION MAKING AND CHOICE OF RICE VARIETIES	59
4.1 Factors Influencing Seed Selection Decision	59
4.2 Incidence of Changing Rice Varieties	61
4.3 Rice Marketing Practices and Constraints	64
4.4 Farmers' Perception on Input Use	66
4.5 Farm Indebtedness	68
4.6 Incidence of Extension Support	71
4.7 Highlights	74
CHAPTER 5. INPUT DEMAND AND OUTPUT SUPPLY ESTIMATIONS	75
5.1 Model Specification	76
5.2 The First Stage Estimation: Probit Maximum Likelihood Model	78
5.3 The Second Stage Estimation: Maximization of the Profit Function	82
5.4 Input Demand and Output Supply Elasticities	89
CHAPTER 6. POLICY ANALYSIS	95

	Page
CHAPTER 7. CONCLUSION AND RECOMMENDATIONS	100
7.1 Summary	100
7.2 Conclusion and Recommendation	104
7.3 Further Areas of Research	107
REFERENCES	109
APPENDIX	112
CURRICULUM VITAE	119

LIST OF TABLES

	Page
Table 1. Rice production performance in Thailand, 1907-1990	2
Table 2. Coppock's instability index for Thai rice	12
Table 3. Second crops grown in general after wet rice in the study area	41
Table 4. Agro-economic profile of the study villages in aggregates in six districts	42
Table 5. General socio-economic information of the sample farms	44
Table 6. Percentage distribution of farm and household assets of sample farms	46
Table 7. Average cost and profitability at farm specific prices of rice production, 1992	48
Table 8. Material inputs in rice production	50
Table 9. Labor inputs in rice production	53
Table 10. Factor shares in rice production	57
Table 11. Ranking of factors influencing farmer's rice variety choice	61
Table 12. Farmers' responses on changing varieties as well as sources for procuring seeds in the past five years	62
Table 13. Percentage distribution of changes in varieties in the past five years, 1987 to 1992	63
Table 14. Farmers' responses on types of problems encountered in rice production	63
Table 15. Rice marketing practices and the average marketing cost of the sample farms	65

	Page
Table 16. Farmers' responses on types of problems encountered in rice marketing	66
Table 17. Input purchasing practices and perception of the sample farmers on the extent of fertilizer use	67
Table 18. Percentage distribution of farmers who were indebted in crop year, 1992	69
Table 19. Average level of indebtedness of rice farms by area and tenancy	70
Table 20. Ranking of the sources of technological information received	72
Table 21. Incidence of training in agricultural production technology of sample farms	73
Table 22. Membership in social organizations	73
Table 23. Probit reduced-form of seed selection equation	79
Table 24. Elasticities of the probability of planting Khao Dawk Mali at sample means	81
Table 25. Joint estimation of the normalized profit function and factor share equations for variable inputs in Khao Dawk Mali, adjusted for selectivity bias	85
Table 26. Joint estimation of the normalized profit function and factor share equations for variable inputs in glutinous rice, adjusted for selectivity bias	87
Table 27. Derived elasticity estimates for rice supply and demand for variable inputs of rice	90
Table 28. Comparisons of selected elasticity estimates with other studies	93
Table 29. Effects of selected policies on wet rice production in Chiang Mai province	96
Table 30. Base-line data used for calculating costs and benefits of alternative inputs and output price policies	97

Table 31. Cost-effectiveness of alternative policies for rice production

APPENDIX TABLES

	Page
Table A1. Area planted, total production and yield of selected rice varieties in Thailand, crop year 1990/1991. (Major rice season only)	113
Table A2. Fertilizer use in Thailand, 1967 to 1990	114
Table A3. Area planted, total production and yield of Khao Dawk Mali in major growing areas of Thailand, 1980/81 to 1990/91.	115
Table A4. Quantity and value of Khao Dawk Mali rice exported from Thailand to rest of the world	116
Table A5. Price of Khao Dawk Mali, RD 15 and local variety of rice in Thailand for the period 1989-1991	117
Table A6. Estimated costs and benefits of alternative policies for rice production	118
