ACKNOWLEDGEMENT

I would like to express my thanks to many people who have provided valuable assistance throughout the graduate study and thesis research.

My respectful acknowledgement and deepest appreciation goes to Assoc. Prof. Dr. Aree Wiboonpongse, Whose kind support, invaluable guidance on mathematical economics, and superior recommendations have guided me from the day I joined the program to the completion of this thesis research. Her understanding and encouragement made me to absorb in studying more than ever before.

I also greatly indebted to Dr. Songsak Sriboonchitta for his precious advises, insight comments, and well meaning suggestions during the conduct of this study. His econometrics expertise has lured me in the domain of quantitative analysis for applied research which is my ever desire.

Valuable suggestions and criticisms from Mr. Phrek Gypmantasiri and Dr. Methi Ekasingh are gratefully recognized. I am also thankful to all respectful Staff members of the Agricultural System Program for providing interesting lectures and conceptual challenges, and to Ms. Laxmi, my academic advisor, for her generous support during two-year study.

Thanks are also due to farmers, village leaders, and officers in study sites in the Mekong Delta who shared their precious time in responding lengthy questionnaire, arranging meetings and making the field survey possible.

The encouragement and providing me with the study leave from my respectful Rector, Assoc. Prof. Dao Cong Tien, is unforgettable. Likewise, the help extended by my colleagues, and two of my undergraduate students, Tri and Han, in the data collection and precomputation are too much to be overlooked.

Thanks are also extended to my classmates and friends for their frankly help, cooperation, and warm relation.

I am grateful to Winrock International- Institute for Agricultural Development for financial support throughout the course of study.

Finally, it is a pleasure to express my hearty thanks to my wife, Ly Kim Hoa, and my daughter, Nguyen Thanh Trang, Who are my source of inspiration and dedication, for their love, understanding, and continuing encouragement during my stay in Chiangmai, Thailand.
