ACKNOWLEDGEMENT	iii
ABSTRACT	v
THAI ABSTRACT	viii
TABLE OF CONTENTS	x
LIST OF TABLES	xvi
LIST OF FIGURES	xx
CHAPTER 1: INTRODUCTION	1
1.1. Introduction	1
1.2. Objectives of the study	4
CHAPTER 2: LITERATURE REVIEW	5
2.1. Review of Vietnam's rice policies in the period 1975- 1995.	5
2.2. Trend of rice production in Vietnam.	8
2.3. Agro- Economy of the North Central Coast Region of Vietnam.	10
2.4. Land use in Thua Thien Hue Province.	11
2.5. Cropping pattern in the delta plain and coastal sandy soil zone of Thua Thien Hue.	12
2.6. Fertilizes application in rice production	12
2.7. Rice yield in Thua Thien Hue Province.	13
2.8. Gross margin analysis.	13

2.9. Production function estimation.	14
CHAPTER 3 : RESEARCH METHODS	17
3.1. Study area, sample size and the scope of the study	17
3.2. Data collection	18
3.3. Methods of analysis	19
3.3.1. Descriptive analysis.	19
3.3.2. Quantitative analysis.	19
CHAPTER 4: PRODUCTION ENVIRONMENT AND CULTURAL PRACTICES	23
4.1: Production environments.	23
4.1.1. Climate condition.	23
4.1.2. Soil characteristics.	24
4.2. Land use and cropping pattern.	26
4.2.1. Cropping pattern	26
4.2.1.1. Cropping pattern in the rainfed lowland soil	27
4.2.1.2. Cropping pattern in the irrigated lowland soil	27
irrigated lowland soil	
4.3. Cultural practices in rice production.	29
4.3.1. Area of rice planted by variety and planting season.	29
4.3.2. Planting date.	31
4.3.3. Land preparation.	32
4.3.4. Planting method and planting density.	33
4.3.5. Weed management.	35

4.3.6 Pest management.	36
4.3.7. Nutrient management.	38
4.3.8. Rice yield of main varieties	39
4.3.9. Source of seed.	40
4.3.10. Methods of selecting and keeping rice seed.	41
CHAPTER 5: FARMER'S DECISION MAKING AND PRODUCTION CONSTRAINTS	42
5.1. Socio- economic information of the sampled farms.	42
5.1.1. Land holdings.	42
5.1.2. Age, household size and occupation	43
5.1.3. Use of labour in rice production	44
5.2. Factors influencing the farmer's decision in selecting rice varieties.	46
5.3. Farmer's opinions of rice growing.	47
5.4. Source of technical knowledge.	48
5.5. Constraints to rice production in the lowland of Thua Thien Hue province.	49
5.6. Farm equipment and assets.	50
5.7. Livestock production.	52
CHAPTER 6: ECONOMIC ANALYSIS OF RICE PRODUCTION	53
6.1. Profitability of irrigated lowland rice production.	54
6.1.1. Profitability of transplanted rice in spring season	54
6.1.2. Profitability of broadcasting rice in the spring season in	55

irrigated regions	
6.1.3. Profitability of transplanting rice in the summer season in irrigated conditions.	55
6.1.4. Profitability of broadcasting rice in the summer season in irrigated conditions.	56
6.1.5. Profitability of transplanting rice in the spring season of the rainfed region.	57
6.1.6. Profitability of transplanting rice in the summer season in rainfed areas.	57
6.1.7. Profitability of broadcasting rice in the summer season in rainfed area.	57
6.2 Comparison of costs and return of transplanting rice and broadcasting rice production.	58
6.2.1. Comparison of transplanting rice and broadcasting rice in the spring season in irrigated region.	58
6.2.2. Comparison of costs and returns of transplanting rice and broadcasting rice in irrigated regions in the summer season by planting method.	59
6.2.3. Comparison of costs and returns of transplanting rice and broadcasting rice in rainfed region in the summer season by planting method.	60
6.3. Analysis of production functions.	61
6.3.1. Model specification	62

6.3.2. Descriptive statistics of the yield and input variables.	63
6.3.3. Simple correlation among explanatory variables.	67
6.3.4. Ordinary Least Square estimates	70
6.3.4.1 OLS estimate of transplanting rice in the spring season in irrigated area	70
6.3.4.2. OLS estimate of transplanting rice in the summer season in irrigated area	72
6.3.4.3. OLS estimate of broadcasting rice in the spring season in irrigated area	73
6.3.4.4. OLS estimate of broadcasting rice in summer season in irrigated area	74
6.3.4.5. OLS estimate of transplanting rice in spring season in rainfed area.	75
6.3.4.6. OLS estimate of transplanting rice in summer season in rainfed area.	76
6.3.4.7. OLS estimate of broadcasting rice in the summer season in rainfed area	77
6.4. The optimization of input use.	78
6.4.1. The optimization of input use for transplanting rice in spring season in irrigated area.	79
6.4.2. The optimization of input use for transplanting rice in summer season in irrigated area.	80
6.4.3. The optimization of input use for broadcasting rice in the	81

spring season in irrigated area.	
6.4.4. The optimization of input use for broadcasting rice in summer season in irrigated area.	81
6.4.5. The optimization of input use for transplanting rice in the spring season in rainfed area.	82
6.4.6. The optimization of input use for transplanting rice in the summer season in rainfed area.	83
6.4.7. The optimization of input use for broadcasting rice in summer season in rainfed area.	83
CHAPTER 7: DISCUSSION, CONCLUSION AND RECOMMENDATION	85
7.1. DISCUSSION	85
7.2. CONCLUSION	89
7.3. RECOMMENDATION	92
REFERENCES	94
CURRICULUM VITAE	97

LIST OF TABLES

	Page
Table 1: Total respondents by location	18
Table 2: Soil chemical characteristics in different cropping systems	25
Table 3: Chemical characteristics of coastal sandy soil in Thua Thien Hue province	26
Table 4: Rice planted area by variety and water regime	31
Table 5: Land preparation by planting method and location	33
Table 6: Percent of rice area and plant density by location and planting season	34
Table 7: Weed management for rice production	36
Table 8: Frequency of pesticide application in rice pest management	37
Table 9: Fertilizes used for rice production by location and planting method (kg/sao)	38
Table 10: Average rice yield of main rice varieties by planting season and water regime (ton/ha)	39
Table 11: Sources of seed by planting season and location	40
Table 12: The method of selecting and storing rice (% of response)	41
Table 13: Land holding by location	43
Table 14a: Household characteristics	43
Table 14b: Household characteristics	44
Table 15: Labor used in rice production	45
Table 16: Factors influencing farmer's decision in selecting variety by	47

	location and planting season (% response)	
Table17:	Farmer's use of rice output (% response)	48
Table 18:	Sources of technical knowledge (% response)	49
Table 19:	Factors constraining irrigated and rainfed lowland rice production in Thua Thien Hue province (% response)	50
Table 20:	Some main farm assets by location	51
Table 21:	Livestock production by location	52
Table 22:	Factor shares and return from irrigated rice production by different planting methods	54
Table 23:	Factor shares and return from Rainfed rice production by different planting method	58
Table 24:	Comparison of cost and return in irrigated rice production by planting method in the spring season	59
Table 25:	Comparison of cost and return in irrigated rice production by planting method in summer season	60
Table 26:	Comparison of cost and return in Rainfed rice production by planting method in summer season	61
Table 27:	Model specification	62
Table 28a:	Descriptive statistics of the original data.	64
Table 28b:	Descriptive statistics of original data	65
Table 29:	Descriptive statistics of original data	66
Table 30a:	Simple correlation among explanatory variables for irrigated rice	67

	production system	
Table 30b:	Simple correlation among explanatory variables for irrigated rice production system	68
Table 31:	Simple correlation among explanatory variables for rainfed rice production system	69
Table 32:	OLS estimate of transplanting rice in the spring season in irrigated area	71
Table 33:	OLS estimate of transplanting rice in the summer season in the irrigated area	72
Table 34:	OLS estimate of broadcasting rice in the spring season in irrigated area	73
Table 35:	OLS estimates of Broadcasting rice in summer season in irrigated area	74
Table 36:	OLS estimates of Transplanting rice in spring season in rainfed area	75
Table 37:	OLS estimates of transplanting rice in summer season in rainfed area	76
Table 38:	OLS estimates of Broadcasting rice in summer season in Rainfed area	77
Table 39:	Comparison of MVP to input prices of transplanting rice in spring season in irrigated area	80
Table 40:	Comparison of MVP to input prices of transplanting rice	80

	in the summer season in irrigated area	
Table 41:	Comparison of MVP to input prices of broadcasting rice	81
	in the spring season in irrigated area	
Table 42:	Comparison of MVP to input prices of broadcasting rice	82
	in the summer season in irrigated area	
Table 43:	Comparison of MVP to input prices of transplanting rice	82
	in spring season in rainfed area	
Table 44:	Comparison of MVP to input prices of transplanting rice	83
	in summer season in rainfed area	
Table 45:	Comparison of MVP to input prices of broadcasting rice	84
	in the summer season in rainfed area	

LIST OF FIGURES
