Thai Abstract	viii
Table of Contents	xi
List of Tables	xv
List of Figures	xvii
Abbreviations	xviii
CHAPTER I INTRODUCTION	**1**
1.1 Background	1
1.2 Statement of problems and rationales	3
1.3 Literature review	5
1.3.1 Previous studies related to farming and dairy farming	5
1.3.2 Some studies into the marketing system	7
1.3.3 Concept of production function and its application to dairy farming	9
1.3.3.1 Concept of production function	9
1.3.3.2 Production function estimation in the dairy farm sector	10
1.4 Objectives of the study	11
1.5 Usefulness of the study	12
CHAPTER II RESEARCH METHODS	**13**
2.1 Scope of the study	13
2.2 Data collection	14
2.2.1 Secondary data	14
2.2.2 Primary data	14
2.2.3 Sampling technique	15
2.3 Data analysis	16
2.3.1 The descriptive analysis	17
2.3.2 Quantitative analysis	18

ลิขสิทธิ์มหาวิทยาลัยเชียงใหม่ Chiang Mai University

2.3.2.1 Cobb-Douglas production function 18
2.3.2.2 Definition of the variables used in the model 19

CHAPTER III CHACRACTERISTICS OF THE STUDY AREAS 22
3.1 Description of the study areas 22
3.1.1 General characteristics of the RRD 22
3.1.2 Some characteristics of the study sites 23
3.2 Background on sampled households 25
3.2.1 Age 25
3.2.2 Education level 26
3.2.3 Dairy farm experience 27
3.2.4 Household size and land holding 28
3.2.5 Farm equipment 30
3.2.6 Structure of household income 31
3.3 Farming system of the study areas 32
3.3.1 Crop and grass components 34
3.3.2 Livestock component 38
3.3.3 Planted forestry and fruit trees 39
3.3.4 Off-farm activities 40
3.3.5 Socioeconomic environment 40
3.3.5.1 Access to credit 41
3.3.5.1 Access to information 43

CHAPTER IV MILK PRODUCTION SYSTEM 45
4.1 Dairy farm size 45
4.2 Structure of cow herd in the interviewed households 46
4.2.1 The kinds of breed in different agro-ecological region 46
4.2.2 Structure of cow herd 47
4.3 The number of breeds used in the household 49
4.4 Feeding practices in the study area 50
4.5 Disease situation of the study area 53
4.6 Average milk yield in a milking cycle of ten months 55

4.7 Costs of milk production 56
4.7.1 Cost of crossbred Sindhi cow production 57
4.7.2 Cost of F1 ½ HF blood cow production 58
4.7.3 Cost to F2 ¾ HF blood cow production 60
4.8 Profitability of milk production 62
4.9 Reason for dairy farming of farmers 64
4.10 Farmers' problems in milk production and marketing 66

CHAPTER V MILK MARKETING SYSTEM 68
5.1 Marketing agents 68
5.1.1 Intermediary agents 68
5.1.1.1 Collectors 69
5.1.1.2 Milk collection co-operatives 70
5.1.1.3 Milk collection stations 71
5.1.2 Milk processors 72
5.1.2.1 Milk processing factories 73
5.1.2.2 Fresh milk shops 73
5.2 Marketing channels 75
5.3 Number of buyer in the region 77
5.4 Mode of transportation 80
5.5 Pricing and quality practice 81
5.5.1 Pricing and quality practices at milk collection points and Nestle milk factory 82
5.5.2 Pricing and quality practices at Hanoi milk factory 84
5.5.3 Pricing and quality practices at fresh milk shops 90
5.5.4 Selling and buying price of intermediaries in the region 92
5.6 Marketing costs 93
5.7 Marketing margins 96

CHAPTER VI FACTORS AFFECTING MILK OUTPUT 98
6.1 The model 98
6.2 Descriptive statistics of the variables 99

6.3 Test for multicollinearity 100
6.4 Test for heteroscedasticity 101
6.5 Empirical results and discussion 103
6.6 Optimization of input use 107
6.7 Opportunities and constraints in milk production and marketing in the study area 109
6.7.1 Opportunities for promotion of dairy sector in the study area 111
6.7.2 Constraints on promotion of dairy farming in the study area 113

CHAPTER VII CONCLUSION AND RECOMMENDATION 115
7.1 Summary 115
7.2 Conclusion and recommendation 120

LIST OF TABLES

Table		Page
1.1	The situation of development of cow herds in Vietnam	2
1.2	Cow population in different regions of Vietnam	2
2.1	Total respondents by location	16
3.1	Some characteristics of the study sites	24
3.2	Age distribution of the household heads	25
3.3	Education level of the respondents	26
3.4	Dairy farming experience of the respondents	27
3.5	Household size and average land holding	29
3.6	Major farm equipment of a household	30
3.7	Sources of the household income	31
3.8	Average area, yield and production of major crops	35
3.9	Dominant livestock types in the study area	38
3.10	Farmers' access to credit in Hanoi	42
3.11	Farmers' access to credit in Hatay	42
3.12	Ranking sources of technological information by Hanoi farmers	43
3.13	Ranking sources of technological information by Hatay farmers	44
4.1	Size distribution of farm households in the study area	46
4.2	Crossing formula of some cow breeds reared in the RRD	47
4.3	Structure of cow herds in sample households	48
4.4	Number of breeds used in the interviewed household	50
4.5	Feed constituents for selected milking cow groups	51
4.6	Common diseases in the region	53
4.7	Costs of crossbred Sindhi cow production	58
4.8	Costs of F1 cow production	59
4.9	Costs of F2 cow production	61
4.10	Economics of raising a milk cow	62
4.11	Comparison on return from rice and dairy in the study area	63
4.12	Reasons for dairy farming of Hanoi farmers	64
4.13	Reasons for dairy farming of Hatay farmers	65

4.14	Problems in milk production as perceived by Hanoi farmers	67
4.15	Problems in milk production as perceived by Hatay farmers	67
5.1	General characteristics of the intermediaries in the study area	69
5.2	Average number of potential and actual buying agents in Hanoi	78
5.3	Average number of potential and actual buying agents in Hatay	78
5.4	Transportation means	80
5.5	Quality standards and respective price levels of raw milk	82
5.6	Milk quality practiced by dairy farmers in different locations	84
5.7	Discount levels of price according to a quality indicator	86
5.8	Milk quality practiced by the co-operative	88
5.9	Milk quality practiced by the Bavi collection station	89
5.10	Quantity and pricing practice of intermediary agents	93
5.11	Marketing costs of intermediary agents	94
5.12	Marketing costs of fresh milk shop	96
5.13	Marketing margin of each marketing agent	97
6.1	Descriptive statistics of the variable included in the model	99
6.2	Correlation coefficients of the explanatory variables	101
6.3	Results of WLS estimation	103
6.4	Comparison of MVP to input prices in the study area	108

ลิขสิทธิ์มหาวิทยาลัยเชียงใหม่

LIST OF FIGURES

Figure		Page
2.1	The map showing location of the study sites	16
3.1	Farming system of the study areas	33
3.2	Cropping pattern in the study areas	34
4.1	Milk yield of different cow breeds in a milking cycle of 10 months	55
4.2	Average milk yield in different months of a milking cycle	56
5.1	Milk marketing channels in Hanoi	76
5.2	Milk marketing channels in Hatay	76
5.3	Average buying quantity and prices of milk shops in the study areas	91
6.1	Distribution of MVP_x / P_x ratio for concentrates variable	109
6.2	Distribution of MVP_x / P_x ratio for fodder variable	109
6.3	Distribution of MVP_x / P_x ratio for labor variable	110

ABBREVIATIONS

CS	= Crossbred Sindhi
F1	= F1 ½ blood of Holstein- Friesian
F2	= F2 ¾ blood of Holstein- Friesian
F3	= F3 3/8 blood of Holstein- Friesian
HF	= Holstein - Friesian
ha	= Hectares
hh	= Household
MP	= Marginal Product
RRD	= Red River Delta
MVP	= Value of Marginal Product
WLS	= Weighted Least Square
VND	= Vietnamese Dong
