ACKNOWLEDGMENTS

As you know, I received my scholarship from the Ford Foundation so I can study here in the Multiple Cropping Center. Also I received scholarship fund supporting my research in order to completing my thesis from the National Biotechnology Center, I have many great friends, supporters, and family to give thanks to.

Firstly, a special thanks you tremendously to my advisor, Associate Professor Dr. Aree Wiboonpongse. With her great patience and thankful gratitude, she helped me keep my focus to the ideas and format of my thesis. She contributed much of her time to endless suggestions and corrections of my work. Without her mentoring, the understanding of my work would not be as clear and I would not finish my this graduated, thank you.

Also, I am grateful to the other committee members Dr. SongSak Sriboonchitta Assistant Prof.Dr. Pattana Jierwiriyapant and Assistant Prof. Dr. Pittaya Sruamsiri as well for all their help and direction.

I would like to thank my friends at the MCC: Sonum, Hien, Dung, Zhang, Xuan Yi, and Tip, who gave me the strength and extra willpower to help pull Watna through all this. I especially would like to say thank you to my friends Orn, Aund and Phi Meaw, Phi Nong, Phi Aoi, Phi Tanya and Sanan who gave me encouragement, helped with some of the data analysis, and were there for the advice. They also were there as my research assistants and helped me set my goals in completing this thesis. They not only helped me from a student stand point, but, more importantly as friends, thank you.

Also, special thanks to Mr. Michael Yannutz who is my best friend during my time in doing my thesis. He corrected and helped edit my English writing and grammar. I am highly grateful to him for his kindness and inspiration throughout my study.

With the professional guidance and advice I received, I would also like to thank the following Chiang Mai University personnel. First to Assistant Professors Dr. Pittaya Sruamsiri and Dr. Sanchai Jaturasittra who are my bosses that gave me the needed time off at work and helped me time manage my study. They were also there to help me with advice and leadership to complete my thesis.

I most likely would not have been able to complete my schooling without the caring support and concern from my family. I would like to thank my close family for being there with their support, especially from that of my mother, brother, and sister. I would like to give special thanks and memory to my father, who passed away a little over a year ago. Without him, I would never have been here completing my thesis for a Masters Degree. He always kept me focused in my schooling and always made it a priority to get me to the University level. He passed away before I could finish, but I know he is watching over me right now, and I would like to say thank you dad.

With all the above, I deeply pay my respect to for blessing on me to accomplish the study successfully. Again, there are many people to thank for your support and thoughts in helping me to complete my thesis, thank you.
