

Appendix A: Layout of experimental system

System:

- 1. CPMS: Cambodian Pest Management System
- 2. IPMS: Integrated Pest Management System
- 3. LIRCS: Low Input Rice Cultivation System

System variables:

- 1. CPMS: Fertilizers + Conventional spray of insecticide
+ Old seedlings + High seedling density
- 2. IPMS: Fertilizers + Threshold-based spray of insecticide
+ Young seedlings + Low seedling density
- 3. LIRCS: No fertilizers + No pest management + Young seedlings
+ Low seedling density

Appendix B: Data obtained from the field experiment

B 1: Transformed data (Log x+1) of *Nephrotettix* spp. recorded by visual count.

System	<i>Nephrotettix</i> spp. pop.				Total	Mean
	Rep. I	Rep. II	Rep. III	Rep. IV		
CPMS	0.90309	0.60206	0.4771213	0	1.98227	0.49557
IPM	0.7781513	0.69897	0.30103	0.9542425	2.73239	0.6831
Control	0.60206	0.60206	0.7781513	0.69897	2.68124	0.67031
Total	2.2833013	1.90309	1.5563026	1.6532125	7.39591	

B 2: Transformed data (Log x+1) of *Nephrotettix* spp. recorded by sweep net.

System	<i>Nephrotettix</i> spp. pop.				Total	Mean
	Rep. I	Rep. II	Rep. III	Rep. IV		
CPMS	1.1139434	0.8451	0.9542425	0.69897	3.61225	0.90306
IPM	1.1760913	1.14613	1.0413927	0.90309	4.2667	1.06668
Control	1.146128	1.17609	0.845098	1.20412	4.37144	1.09286
Total	3.4361627	3.16732	2.8407332	2.80618	12.2504	

B 3: Transformed data (Log x+1) of *N. virescens* recorded by visual count.

System	<i>N. virescens</i> pop.				Total	Mean
	Rep. I	Rep. II	Rep. III	Rep. IV		
CPMS	0.60206	0.30103	0.30103	0	1.20412	0.30103
IPM	0.47712	0.47712	0.30103	0.60206	1.85733	0.46433
Control	0.47712	0.30103	0.30103	0.60206	1.68124	0.42031
Total	1.5563	1.07918	0.90309	1.20412	4.74269	

B 4: Transformed data (Log x+1) of *N. nigropictus* recorded by visual count.

System	<i>N. nigropictus</i> pop.				Total	Mean
	Rep. I	Rep. II	Rep. III	Rep. IV		
CPMS	0.69897	0.47712	0.30103	0	1.47712	0.36928
IPM	0.60206	0.47712	0	0.77815	1.85733	0.46433
Control	0.30103	0.47712	0.69897	0.30103	1.77815	0.44454
Total	1.60206	1.43136	1	1.07918	5.11261	

B 5: Transformed data (Log x+1) of *N. virescens* recorded by sweep net.

System	<i>N.nigropictus</i> pop.				Total	Mean
	Rep. I	Rep. II	Rep. III	Rep. IV		
CPMS	0.90309	0.60206	0.69897	0.47712	2.68124	0.67031
IPM	0.77815	0.8451	0.69897	0.47712	2.79934	0.69984
Control	0	0.47712	0.69897	0.95424	2.13033	0.53258
Total	1.68124	1.92428	2.09691	1.90849	7.61092	

B 6: Transformed data (Log x+1) of *N. nigropictus* recorded by sweep net.

System	<i>N.nigropictus</i> pop.				Total	Mean
	Rep. I	Rep. II	Rep. III	Rep. IV		
CPMS	0.77815	0.60206	0.69897	0.47712	2.5563	0.63908

CURRICULUM VITAE

Name:	Ker Monthivuth
Date of birth:	September 07, 1971
Educational background:	
1992-1996	B.S. Agricultural Science Royal University of Agriculture, Phnom Penh, Cambodia
2000-2002	M.S. Agriculture (Agricultural Systems) Chiang Mai University, Chiang Mai, Thailand
Scholarship for:	Department of Technical and Economic Cooperation
M.S. study	(DTEC), Thailand
Work experiences:	
1996-1997	Research Assistant, the Institute for Khmer Traditional Textile (IKTT), and Provincial Project Officer, HEKS International Organization
1997-1998	Plant Protection Officer
1998-Present	Vice Chief of Planning and International Collaboration Office, Department of Agronomy and Agricultural Land Improvement (DAALI), Ministry of Agriculture, Forestry, and Fisheries (MAFF), Phnom Penh, Cambodia
Home Address:	202D, Rd. European Union, Sangkat (Quarter) Beong Keng Kang 2, Chamkar Mon, Phnom Penh, Cambodia E-mail: monthivuth@yahoo.com
Office Address:	Department of Agronomy and Agricultural Land Improvement (DAALI) Bd. 10, Moni Reth Bld., Sangkat (Quarter) Toul Svay Prey 2, Chamkar Mon, Phnom Penh, Cambodia
