Acknowledgement

I greatly thank Asst. Prof. Dr. Pittaya Srumsiri research advisor and Asst. Prof. Dr. Soraya Ruamrungsri co-advisor for their suggestion, teaching and encouragement. Thank Lect. Dr. Nuttha Kuanprasert for her comment and readability in this thesis.

Special thanks go to Prof. Dr. Volker Roemheld (Institut für Pflanzenernährung, Universität Hohenheim, Stuttgart, Germany) and Prof. Dr. Fritz Bangerth, Institut für Obst-, Gemüse und Weinbau, Universität Hohenheim, Germany for their scientific support, and important discussion. Thank also Mrs. Maria. Ruckwied and Mrs. Elke Dahtler for their assistance in laboratory.

Appreciate to Dr. Andreas Neef, coordinator of the Uplands Program, for his valuable support and all staffs of the office of the Uplands Program at Chiang Mai University particularly Mrs. Yaowanart Sripan, Mr. Sukit Kanjina and Mr. Arthit Didbanchong for their help.

I thank all staff members of subproject D1 (NRCT-DFG Program), Aisst. Lect. Pawin Manochai, Ms. Amonat Chatrakul, Mrs. Daruni Naphrom, Mr. Noporn Boonplod, Mr. Martin Hegele and all students for their advice in data collection .

I am grateful to my parents and my brother as well as my best friends for their constant encouragement, generosity and understanding during my study.

This research was financial funded by Subproject D1 under the NRCT-DFG Program
