

Table of Contents

	Pages
Acknowledgments.....	iii
Abstract in English.....	v
Abstract in Thai.....	vii
List of Tables	xii
List of Figures	xiii
Chapter I Introduction	1
Chapter2 II Literature Review	4
2.1 Participatory approach in agriculture development.....	4
2.1.1 Participatory concept.....	4
2.1.2 Participatory in agriculture and PRA approaches.....	5
2.2.3 Participatory method for identifying the constraints to maize production and dissimilation of the new technology.....	8
2.2 Quantitative assessment in agriculture	10
2.3 Maize production system in developing countries	13
2.4 Constraints to maize production in tropical maize system.....	14
2.4.1 The abiotic constraints	14
2.4.2 The biotic constraints.....	15
2.5 Maize production system in Vietnam.....	16
Chapter III Methodology	19
3.1 The scope and limitation of the study	19
3.2 Field survey.....	19
3.2.1. Site selection	19
3.3 Data collection.....	20
3.3.1 Secondary data	20
3.3.2 Primary data.....	20
3.3.2.1 Participatory Rural Appraisal	20

3.3.2.2 Interview individual farmer household	22
3.4 Data analysis	22
3.4.1 Descriptive analysis	22
3.4.2 Quantitative assessment in maize production	23
3.4.2.1 Quantitative model.....	24
3.4.2.2 Definition and measurement of variables	25
Chapter IV Study Site and Agricultural Production	26
4.1 Study sites	26
4.1.1 Physical characteristics	26
4.1.2 Social and economic characteristics	31
4.2 Agricultural production.....	33
4.2.1 Land use in villages	34
4.2.2 Cropping systems	38
4.2.3 Farmer practices on some main crops	39
Chapter V Maize Production and Constraints	44
5.1 Maize production.....	44
5.1.1 Land use for maize and land characteristics.....	44
5.1.2 Maize variety	47
5.1.3 Types of maize production	48
5.1.4 Inputs use for maize production	49
5.1.4.1 Seed.....	49
5.1.4.2 Fertilizers application.....	49
5.1.4.3 Pesticides use	50
5.1.4.4 Labor use.....	53
5.1.5 Farmers' field practices in maize production	53
5.1.5.1 Distribution of maize growers in terms of fertilizer use	53
5.1.5.2 Farmers' field practices.....	55
5.1.6 Maize yield and yield gap analysis	57
5.1.6.1 Maize yield	57
5.1.6.2 Yield gap analysis	59
5.2 Constraint to maize productivity	62
5.2.1 Constraints identification.....	62

5.2.2 Prioritizing the constraints	64
5.2.2.1 Prioritizing constraints to maize productivity in the steepland area ..	64
5.2.2.2 Prioritizing constraints to maize productivity in the midland area ...	65
5.2.2.3 Prioritizing constraints to maize productivity in the flatland area	67
5.3 Constraints and quantitative assessment	68
5.3.1 Descriptive statistics of the variables	68
5.3.2 Estimate production function.....	69
5.3.3 Estimate yield gap due to yielding constraints	72
 Chapter VI Discussion and Possible Solutions	76
6.1 Land use	76
6.2 Cropping system.....	77
6.3 Maize production.....	78
6.3.1 Land use for maize.....	78
6.3.2 Fertilizers use for maize.....	79
6.3.3 Maize yield and yield gap	81
6.4 Constraints and its relative importance	82
6.5 Quantitative assessment on yielding constraint factors.....	83
6.5.1 Drought	83
6.5.2 Soil erosion.....	84
6.5.3 Old varieties	85
6.5.4 Low soil fertility	86
6.5.5 Shortage and imbalance in fertilizer use.....	87
6.5.6 Weed competition.....	88
6.5.7 Damage of insect and diseases	89
6.5.8 Farmer lack of technology	90
6.6 Possible solutions for maize production.....	91
 Chapter VII Conclusions and Recommendations	94
Reference	97
Appendix.....	105
Curriculum Vitae.....	119

List of Tables

Tables	Pages
1. Area planted and maize yield in Vietnam in 1961-2001 periods.....	17
2. Soil characteristics of some major soil groups in Son La province	30
3. Land distribution and social-economic situation in Moc Chau and Mai Son.....	32
4. Productivity and area of main crops in Moc Chau and Mai Son districts	33
5. Land distribution in four villages.....	34
6. Land use of household in villages.....	37
. Farmer's practice in some food crops production.....	41
. Farmer's practice in some food crops production.....	42
. Farmer's classification on potential zones for maize production.....	45
10. Land area for maize production in different parts of upland	47
11. Types of maize production in four villages	48
12. Average inputs used for maize in the steepland area	51
13. Average inputs used for maize in the midland area	52
14. Average inputs used for maize in the flatland area	52
15. Distribution of farmer households in fertilizer used in three land types.....	54
. Farmers' field practice in maize production.....	56
17. Maize yield on different land types in the upland area	58
18. Prioritize the constraints to maize productivity in the steepland area	65
19. Prioritize the constraints to maize productivity in the midland area	66
20. Prioritize the constraints to maize productivity in the flatland area	67
21. Descriptive statistics of the variables in model for maize production.....	68
22. Coefficients of variables result from production function for maize.....	70
23. The model estimate contribution of constraints to yield gap	73

List of Figures

Figures	Pages
1. The map of Vietnam and Son La Province showed study sites	27
2. The resource map of Ang village	28
3. Climatic characteristics in Son La province	29
4. Land use in Ang village	36
5. Land use in Ban Hoa village	36
6. Land use in Co Noi village	36
7. Land use in Chieng Ban village	36
8. Cropping systems in the rainfed area.....	38
9. Transect of land use for maize production in upland area	44
10. The yield gap among land types	61
11. The yield gap among varieties	61
12. Yield distribution in steepland	61
13. Yield distribution in midland	61
14. Yield distribution in the flatland	61
15. Causal diagram of constraints affected maize productivity.....	63
