

## TABLE OF CONTENTS

	<b>Page</b>
Acknowledgements	iii
Abstract in English	iv
Abstract in Thai	viii
List of Tables	xiii
List of Figures	xiv
Chapter 1 Introduction	1
1.1 Problem statement	2
1.2 Research objective	4
Chapter 2 Literature review	5
2.1 Peri-urban agriculture	5
2.2 Farmer field school approach	6
2.3 Limitations and strength of FFS approach	10
2.4 Farmer field school in Thailand	11
Chapter 3 Methodology	13
3.1 Characterization of the peri-urban system	13
3.2 Farmer field school for pesticide-free vegetable production	14
3.3 Condition, limitation and constraints in conversion to pesticide-free vegetable	16
3.4 Data analysis	17
Chapter 4 Peri-urban farming system of Chiang Mai valley	20
4.1 Characterization of peri-urban area	20
4.2 Characterization of peri-urban vegetable farmers	26

4.3	Vegetable production system in peri-urban area	28
4.4	Farmer organization	35
4.5	Farmer typology	35
Chapter 5	Farmer field school for pesticide-free vegetable production	38
5.1	Farmer field school activities	38
5.2	After FFS	47
5.3	Farmers' learning through farmer field school approach	47
5.4	Organization supporting farmers' learning	56
Chapter 6	Limitations and constraints for converting to pesticide-free vegetable production	57
6.1	The past experience in the North	57
6.2	Potential of Ban Ping Noi in pesticide-free vegetable production	58
6.3	Problems in pesticide-free vegetable production	59
Chapter 7	Conclusion	65
References		68
Appendix		
Appendix A:	Type of vegetables planted in Ban Ping Noi, San Sai sub-district, Saraphi district, Chiang Mai	72
Appendix B:	Result of soil analysis	75
Curriculum vitae		76

## LIST OF TABLES

Table	Page
2.1 TOT and FFS compared according to key dimension	8
4.1 The population's structure of San Sai sub-district in year 2001	27
4.2 Cropping systems of farmers in Ban Ping Noi	30
4.3 Common pests observed in vegetable plots during the time of study	32
4.4 Vegetable diseases observed in field during the time of study	33
4.5 Strategy and alternative of vegetable farmers in Ban Ping Noi	37
5.1 Farmer field school activity in pesticide-free vegetable production	40
5.2 Potential of vegetable species in the first crop in Ban Ping Noi, 2003	43
5.3 The risk on production and marketing of vegetables as perceived by local trader	46
5.4 The productivity of vegetables in the farmer experimentation	51
5.5 Yield in the first crop	53
5.6 Productivity and production constraints of vegetable in the second planting (March – June, 2003)	54
5.7 Organization encouraging in farmers' Learning through FFS approach	56
6.1 The comparison of value and net income from selling pesticide-free vegetable	60
6.2 Total labour use in each activity in the conventional planting	61
6.3 Total labour use in each activity in pesticide-free vegetable production	62
6.4 Average cost and return of PFV in the first cycle of production in Ban Ping Noi, Chiang Mai. 2003	64

## LIST OF ILLUSTRATIONS

<b>Figures</b>	<b>Page</b>
1.1 The peri-urban interface of Chiang Mai city	1
3.1 Phases in a process of learning	15
3.2 The process in organizing Farmer Field School for pesticide-free vegetable	17
4.1 The location of Ban Ping Noi, San Sai sub-district, Saraphi district, Chiang Mai	21
4.2 Climates of Saraphi District, Chiang Mai Province in year 2003	22
4.3 The irrigation canal distributed in San Sai sub-district	25
4.4 Occupational structure in San Sai sub-district in year 2003	27
5.1 Market channel of pesticide-free vegetable of Ban Ping Noi	55
