List of Tables	xv
List of Figures	xviii
Abbreviation	xix
Chapter I Introduction	1
1.1 Introduction	1.1
1.2 Rationale	1.2
1.3 Objectives of the study	1.3
Chapter II Literature review	5
2.1 The concept and development of farming systems approach	5
2.2 Major factors affecting the development of agricultural production	7
2.2.1 Market systems	7
2.2.2 Economic and sustainable crop intensification	7
2.3 Farm performance as measure by productivity sustainability and stability	8
2.4 The measurement of performance of the sustainable agriculture	10
2.5 The rice ecosystems in Asia	12
2.6 The agricultural development of Vietnam	13
2.6.1 Agriculture in Vietnam 1976-1994	13
2.6.1.1 The development of agricultural production 1976-1994	13
2.6.1.2 Struggles over agricultural surplus and decollectivization	14
2.6.2 Vietnam's agricultural miracle looking back	15
2.6.2.1 The relative contributions of land expansion and yield improvements	15

2.6.2.2	The importance of investment in irrigation, increased fertilizer availability, and improvements in agricultural prices	16
2.6.2.3	Changes in irrigated area and fertilizer availability, 1976-1993	17
2.7	Farming systems of the Mekong Delta	17
2.7.1	Current land use	18
2.7.2	Rice ecosystems	19
2.7.3	Rice production environment	20
2.7.4	Production constraints	20
2.7.5	Production opportunities	21
Chapter III	Research methods	22
3.1	Scope of the study	22
3.2	Major farming systems	22
3.3	Survey design	23
3.4	Sample collection	23
3.5	Data collection	24
3.6	Data analysis	25
Chapter IV	Study site	28
4.1	Study area overview	28
4.2	Description of the study area	28
4.2.1	The rainfall	29
4.2.2	The intrusion of seawater	30
4.2.3	Soil types	30
4.2.4	Socio-economic characteristics	30
4.3	Rice production in the Dai An village	32
4.4	Four major rice based cropping systems in partially irrigated area	33
4.4.1	Mono traditional rice production system	33
4.4.2	Modern rice - traditional rice production system	34
4.4.3	Mung bean- traditional rice production system	36
4.4.4	Taro - traditional rice production system	36
4.5	Examples of farmer typology of rice-based farming systems in Dai An village	37

4.5.1	Mono traditional rice system	37
4.5.2	Modern rice - traditional system	38
4.5.3	Mung bean - traditional system	38
4.5.4	Taro - traditional system	39
Chapter V	Results and discussion	40
5.1	Change in governmental policy during 1976-2000	40
5.1.1	The first decade after reunification 1976-1986	40
5.1.2	The Doi Moi or economic renovation 1986 -2000	40
5.1.3	The resolution and decision of Tra Cu district during 1976-2000	42
5.1.3.1	1986-1990 period	42
5.1.3.2	1991-1995 period	44
5.2	Agricultural transformation in partially irrigated lowland rice-based farming systems during 1975-2000	45
5.2.1	Change in the rice technology and production during 1975-2000	45
5.2.1.1	Transplanting methods	45
5.2.1.2	Methods of direct seeding (direct dry seeding or direct wet seeding)	46
5.2.1.3	Fertilization	47
5.2.1.4	Pest management	48
5.2.1.5	Weed control	49
5.2.1.6	Water management	50
5.2.1.7	Land preparation	51
5.2.1.8	Farmer training	51
5.3	Results of the process of agricultural transformation in partially irrigated lowland rice-based farming system during 1975-2000	52
5.3.1	Irrigation system	52
5.3.2	The irrigation system in Tra Cu district in 1976-2000	53
5.3.3	Credit supported by government	54
5.4	Increase in planted area and production	54
Chapter VI	Household study	56
6.1	Population structure and farming systems	56

6.1.1	Education level of household members	56
6.1.2	Land holding	57
6.1.2.1	Land holding of farmers in mono traditional rice system	57
6.1.2.2	Land holding of farmers in modern rice-traditional rice system	58
6.1.2.3	Land holding of farmers in mung bean - traditional rice system	59
6.1.2.4	Land holding of farmers in taro-traditional rice system	59
6.2	The farm performance of rice-based farming systems in the partially irrigated lowland	60
6.2.1	Mono traditional rice system in period 1996-2000	60
6.2.1.1	Productivity	60
6.2.1.2	Stability	62
6.2.1.3	Profitability	66
6.2.1.4	Diversity	68
6.2.1.5	Sustainability	70
6.2.2	Modern rice - traditional rice system in period 1996-2000	72
6.2.2.1	Productivity	72
6.2.2.2	Stability	75
6.2.2.3	Profitability	77
6.2.2.4	Diversity	82
6.2.2.5	Sustainability	84
6.2.3	Mung bean - traditional rice system in period 1996-2000	86
6.2.3.1	Productivity	86
6.2.3.2	Stability	89
6.2.3.3	Profitability	92
6.2.3.4	Diversity	95
6.2.3.5	Sustainability	97
6.2.4	Taro - traditional rice system in period 1996-2000	99
6.2.4.1	Productivity	99
6.2.4.2	Stability	101
6.2.4.3	Profitability	103
6.2.4.4	Diversity	106

6.2.4.5	Sustainability	108
Chapter VII	Conclusion and Recommendations	110
7.1	Conclusion	110
7.2	Recommendations	111

List of Tables

Tables	Page
2.1 Systems properties and indicators for measurement of performance	10
2.2 Grown area of rice in 25 years of the Mekong Delta, Vietnam	19
4.1 Education present of population	31
4.2 Popular traditional rice varieties in Dai An village	32
4.3 Popular traditional rice varieties in Dai An village	33
5.1 Change in transplanting methods in Tra Cu district before and during 1975 to 2000 (percentage)	46
5.2 Change in direct seeding methods in Tra Cu district during 1975 to 2000 (percentage)	47
5.3 Change in fertilizer use in Tra Cu district during 1975 to 2000 (percentage)	48
5.4 Change in pest management practices of farmers in Tra Cu district during 1975 to 2000 (percentage)	49
5.5 Change in weed control practice in Tra Cu district during 1975 to 2000 (percentage)	50
5.6 Change in land preparation in Tra Cu district before and during 1975 to 2000 (percentage)	51
5.7 Increasing farmer participating in training in Tra Cu district during 1975 to 2000 (percentage)	52
5.8 Development of irrigation system in Tra Cu District in 1976-2000	53
5.9 Credit provided by government during 1992 to 2000	54
5.10 Change in rice planted area in Tra Cu district during 1976-2000	55
6.1 Population structure and farming system in Dai An village	56
6.2 Education levels of household members	57
6.3 Worksheet for deriving rice productivity values in MTRS of household during 1996-2000 (n=30)	61
6.4 Average monthly incomes of time dispersion and income stability of 30	

farm households in MTRS during 1996-2000 (x1000VND)	64
6.5 Average monthly income of time dispersion and income stability of MTRS during 1996-2000	65
6.6 Gross margin of the traditional rice among 30 farm households in MTRS during 1996-2000	67
6.7 Calculation of DI and R of farm households in MTRS during 1996-2000 (x1000VND)	69
6.8 Calculation of DI and R of MTRS during 1996-2000	70
6.9 Sustainability levels of 30 farms of the MTRS during 1996-2000	71
6.10 Worksheet for deriving rice productivity values on the traditional rice in MR-TRS of household during 1996-2000 (n=30)	72
6.11 Worksheet for deriving rice productivity values on the modern rice in MR-TRS of household during 1996-2000 (n=30)	74
6.12 Average monthly incomes of time dispersion and income stability of 30 farm households in MR-TRS during 1996-2000 (x1000VND)	76
6.13 Average monthly income of time dispersion and income stability of MR-TRS during 1996-2000	77
6.14 Gross margin of traditional rice among 30 farm households in MR-TRS during 1996-2000	79
6.15 Gross margin of modern rice among 30 farm households in MR-TRS during 1996-2000	81
6.16 Calculation of DI of MR-TRS during 1996-2000 (x1000VND)	83
6.17 Calculation of DI and R of MR-TRS during 1996-2000	84
6.18 Sustainability levels of 30 farms of the MR-TRS during 1996-2000	85
6.19 Worksheet for deriving rice productivity values on traditional rice production in MB-TRS of household during 1996-2000 (n=30)	86
6.20 Worksheet for deriving productivity values of mung bean production in MB-TRS of household during 1996-2000 (n=30)	88
6.21 Average monthly incomes of time dispersion and income stability of 30 farm households in MB-TRS during 1996-2000 (x1000VND)	90
6.22 Average monthly income of time dispersion and income stability of	

MB-TRS during 1996-2000	91
6.23 Gross margin of traditional rice among 30 farm households in MB-TRS during 1996-2000	93
6.24 Gross margin of mung bean among 30 farm households in MB-TRS during 1996-2000	94
6.25 Calculation of DI and R of each farm of MB-TRS during 1996-2000 (x1000VND)	96
6.26 Calculation of DI and R of MB-TRS system during 1996-2000	97
6.27 Sustainability level of 30 farms of the MB-TRS during 1996-2000	98
6.28 Worksheet for deriving productivity values of traditional rice production in T-TRS of household during 1996-2000 (n=30)	99
6.29 Worksheet for deriving productivity values of taro production in T-TRS of household during 1996-2000 (n=30)	100
6.30 Average monthly incomes of time dispersion and income stability of 30 farm households in T-TRS during 1996-2000 (x1000VND)	102
6.31 Average monthly income of time dispersion and income stability of T-TRS during 1996-2000	103
6.32 Gross margin of traditional rice among 30 farm households in T-TRS during 1996-2000	104
6.33 Gross margin of taro among 30 farm households in T-TRS during 1996-2000	105
6.34 Calculation of DI and R of each farm of T-TRS during 1996-2000 (x1000VND)	107
6.35 Calculation of DI and R of T-TRS during 1996-2000	108
6.36 Sustainability level of 30 farms of the T-TRS during 1996-2000	109

List of Figures

Figures	Page
3.1 Research conceptual framework	23
4.1 Rainfall distribution in the Tra Cu district, Tra Vinh province	29
4.2 Salinity condition measured in the nearby canal Tra Cu District, Tra Vinh 2000	30
4.3 Cropping calendar of mono traditional rice system	34
4.4 Cropping calendar of modern rice - traditional rice system	35
4.5 Cropping calendar of mung bean- traditional rice system	36
4.6 Cropping calendar of taro - traditional rice system	37
5.1 Irrigating capacity of the irrigation systems of Tra Cu district during 1976- 2000	53
6.1 Change in land holding during 1976-2000 of MTRS	58
6.2 Change in land holding during 1976-2000 of MR-TRS	58
6.3 Change in land holding during 1976-2000 of MB-TRS	59
6.4 Change in land holding during 1976-2000 of T-TRS	59
6.5 Relationship between farm holding size and average rice yield of traditional rice in MTRS	62
6.6 Relationship between farm holding size and average rice yield of traditional rice in MR-TRS	73
6.7 Relationship between farm holding size and average rice yield of modern rice in MR-TRS.	74
6.8 Relationship between farm holding size and average rice yield of traditional rice in MB-TRS	87
6.9 Relationship between farm holding size and average mung bean yield in MB-TRS	89
6.10 Relationship between farm holding size and average rice yield of traditional rice in T-TRS	100
6.11 Relationship between farm holding size and average taro yield in T-TRS	101

List of abbreviations

APR	= Area planted to rice
BCR	= Benefit cost ratio
cm	= Centimeter
CM	= Crop management
CV	= Coefficient of variation
DC	= Disease control
DI	= Simpson's diversity index
FAO	= The united nation's food and agriculture organization
FSR	= Farming system research
FU	= Fertilizer using
GDP	= Gross domestic product
GI	= Goss income
GM	= Gross margin
ha	= Hectare
HYV	= High yield variety
IPM	= Integrated pest management
IRRI	= International rice research institute
kg	= Kilogram
km	= Kilometer
Lateral No. 1	= Lateral canal number one
Lateral No.2	= Lateral canal number two
MB-TRS	= Mung bean – traditional rice system
mm	= Millimeter
MR-TRS	= Modern rice – traditional rice system
MTRS	= Mono traditional rice system
R	= The income diversity ratio
RFLC	= Return to family labor cost
SNM	= Soil nutritional management
RLC	= Return to labor cost

T-TRS	= Taro – traditional rice system
TVC	= Total variable cost
VND	= Viet nam dong
WM	= Water management
WT	= Weed control

Equivalents

Baht 1	= 400 VND (as of September 2003)
US\$ 1	= 15,870 VND (as of September 2003)
