ACKNOWLEDGEMENTS

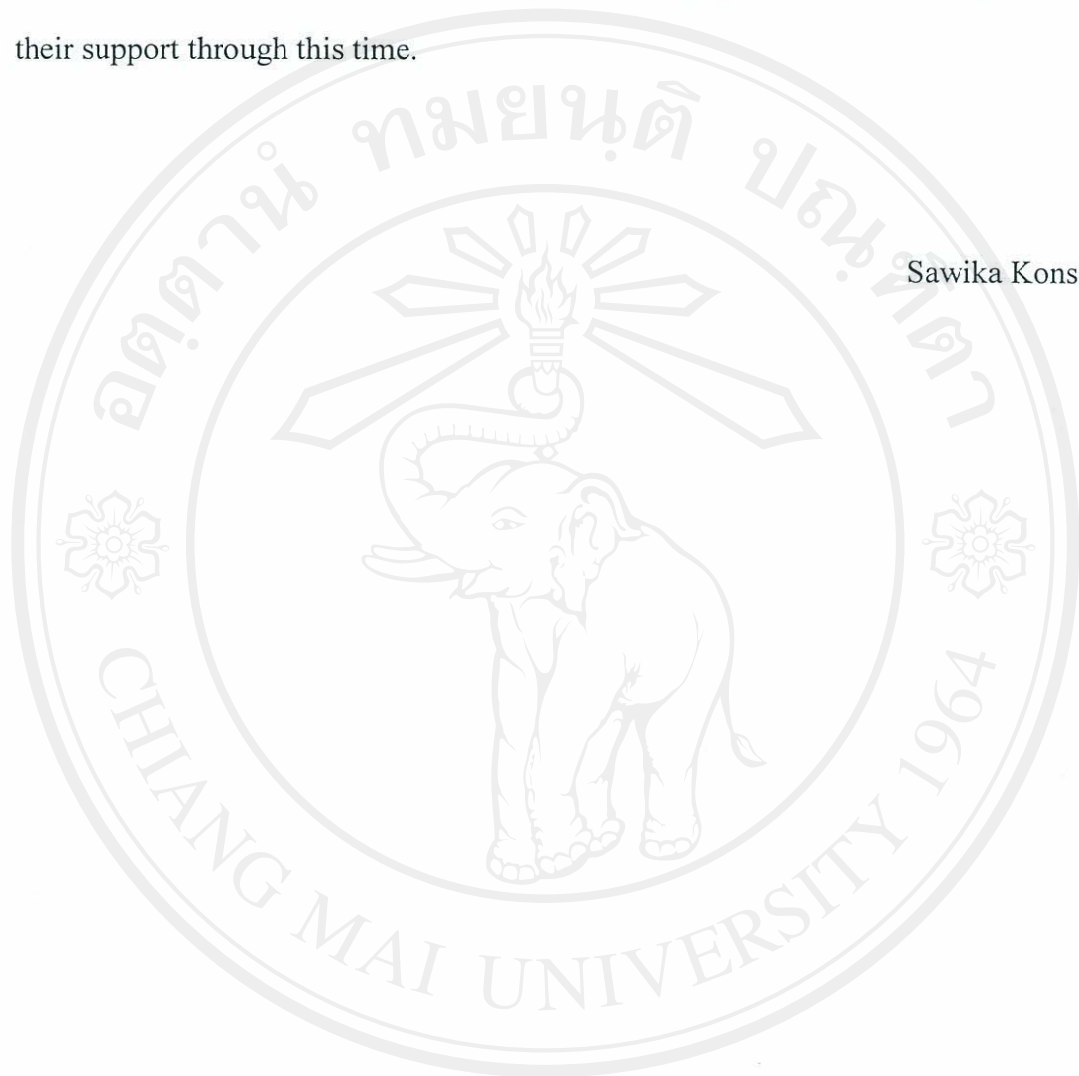

I gratefully acknowledge the Thailand Research Fund for awarding me with a Royal Golden Jubilee Ph. D. Scholarship.

I am deeply grateful to my advisors, Professor Dr. Benjavan Rerkasem, Professor Dr. Bernard Dell and Associate Professor Dr. Sansanee Jamjod, for their all supports during the long process of this thesis.

I also thank to Associate Professor Dr. Sumitra Poovarodom, King Mongkut's Institute of Technology Ladkrabung, for mangosteen leaf samples and valuable advice, and Associate Professor Suthat Julsrigival for kind suggestions.

Special thanks to Dr. Longbin Huang, School of Land, Crop and Food Sciences, the University of Queensland, for seed of peanut cv. TAG 24, a technique of the microwave digestion and useful suggestions for doing research on boron; Mr. Michael Smirk, analytical chemist at the Trace Element Laboratory, the University of Western Australia, for assistance with B-isotopes analysis by ICP-MS; staff of the glasshouse in the School of Biological Sciences and Biotechnology, Murdoch University for technical support of that part of research conducted at Murdoch University; Mr. Sittichai Lordkaew and staff at the Multiple Cropping Center laboratory, Faculty of Agriculture, Chiang Mai University, for analysis facilities and their help with laboratory work, and all staff and students at the CMUPN*lab*, Department of Agronomy, Faculty of Agriculture, Chiang Mai University for their help and friendship.

Finally, I would like to thank my mother, my grandmother and my brother for their support through this time.

Sawika Konsaeng
