Acknowledgement	iii
Abstract in Thai	v
Abstract in English	vii
Table of Contents	ix
List of Tables	xiii
List of Figures	xv
Abbreviations	xvi
<b>CHAPTER 1 INTRODUCTION</b>	
1.1 Background	1
1.2 Rationale of study	4
1.3 Objectives of study	7
1.4 Usefulness of the study	7
<b>CHAPTER 2 LITERATURE REVIEW</b>	
2.1 Definition of agricultural extension	8
2.2 Agriculture extension system in Asia countries	8
2.3 Models of agriculture extension	10
2.4 Extension approaches	12
2.4.1 Farmer to farmer	13
2.4.2 Demonstration	13
2.4.3 Farmer field school (FFS)	15
2.4.4 Training and visit system	16
2.4.5 Mass media and broadcasting agricultural technologies	16
2.4.6 Farmer field day	17
<b>CHAPTER 3 RESEARCH METHODS</b>	
3.1 Site selection	18
3.2 Sampling techniques	19
3.3 Data collection	20
3.3.1 Secondary data	20

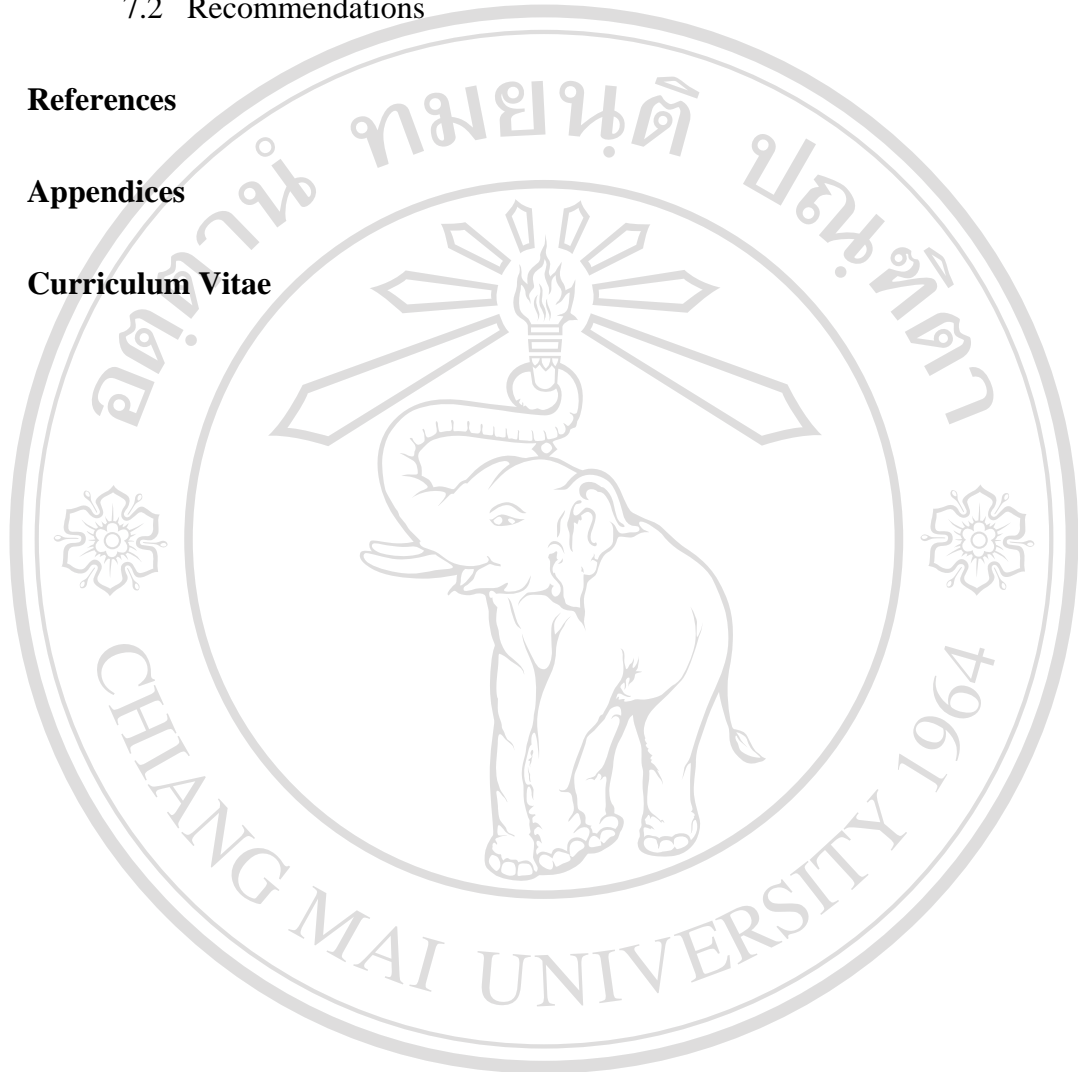

3.3.2	Primary data	20
3.3.3	Village head and elderly people	21
3.3.4	Vegetable growers	21
3.3.5	Agriculture and development related officers	21
3.3.6	Key informant interview	22
3.3.7	Direct observation	22
3.3.8	Participatory workshop	22
3.4	Data analysis	22
<b>CHAPTER 4 GENERAL PROFILE AND PRODUCTION SYSTEMS OF THE STUDY AREA</b>		
4.1	Biophysical condition	25
4.1.1	Climate	26
4.1.2	Socio-economic setting	26
4.1.3	Soil	26
4.1.4	Land use	26
4.1.5	Sources of income	27
4.2	Agricultural production at study area	28
4.2.1	Major crops	28
4.2.2	Fruit trees production	29
4.2.3	Livestock production	30
4.2.4	Land holding	31
4.3	Cropping pattern	32
4.4	Vegetable production	34
4.4.1	Yard long bean production	34
4.4.2	Cucumber production	35
<b>CHAPTER 5 FARMERS' PRACTICES AND CONSTRAINTS IN STUDY AREA</b>		
5.1	Farmers' practices	37
5.1.1	General characteristic of farmers' practices	37
5.1.2	Farmers' practice in three villages compared	39

5.2	The characteristic of respondents at the survey villages	39
5.3	Constraint in farmer practice	43
5.3.1	Biophysical constraint	43
5.3.2	Farmers' use of pesticide	44
5.3.3	Farmers' use of fertilizer	44
5.3.4	Marketing channel and vegetable price	45

## **CHAPTER 6 ASSESSING THREE TECHNOLOGY DISSEMINATION SYSTEMS IN VEGETABLE PRODUCTION OF STUDY VILLAGES**

6.1	Extension system in Cambodia	47
6.1.1	Role of extension systems in Cambodia	47
6.2	Type of extension systems	48
6.2.1	Government system	48
6.2.2	Non-government organizations system (NGOs)	49
6.2.3	Farmer to farmer system ( Farmer group)	53
6.3	The assessment of IPM/FFS lead by extension program	53
6.4	The effectiveness of extension program on vegetable production	55
6.4.1	Productivity	55
6.4.2	Profitability	56
6.4.3	Farmers' knowledge	57
6.5	The information access on vegetable production	61
6.5.1	Information approaching to improves vegetable production	61
6.5.2	Extension visited after training and activities with extension program	62
6.5.2	Credit access on vegetable production	63
6.6	Implementation of extension program on IPM/FFS practice	64
6.7	Advantage and suggestion of IPM approach	65
6.8	Potential dissemination of extension program	68

<b>CHAPTER 7 CONCLUSIONS AND RECOMMENDATION</b>	
7.1 Conclusions	71
7.2 Recommendations	72
<b>References</b>	74
<b>Appendices</b>	79
<b>Curriculum Vitae</b>	82

## LIST OF TABLES

<b>Tables</b>		<b>Page</b>
1.1	Major crop production in Cambodia	2
3.1	Distribution of sample size	20
4.1	Distance travel to market from the studied village	26
4.2	Sources of annual income in three villages	28
4.3	Land use for agriculture of Somroung Thom commune	29
4.4	Type of fruit tree grown in three villages of Somroung Thom commune	30
4.5	Livestock of Somroung Thom commune	31
4.6	Land use in six villages under Somroung Thom commune	31
4.7	Cropping systems in Somroung Thom commune	32
5.1	Farmers' practices in three villages of Somroung Thom commune	39
5.2	The education status and farmer experiences of respondents	40
5.3	The vegetable farm size in study area	41
5.4	Technical and socio-economic constraints of vegetable production in three villages	42
5.5	Farmers' marketing channels of vegetable production	46
5.6	The price of vegetable in Somroung Thom commune	46
6.1	Farmer household access to extension program at Somroung Thom commune	54
6.2	Farmers' access to technical training	55
6.3	The average of productivity of yard long bean among three groups of farmers	56
6.4	Cost and benefit of vegetable production (x1,000 riels)	57
6.5	Farmers' decision on pesticide use in vegetable production	58
6.6	Farmer perception pesticide hazarded	59
6.7	Farmers' disposal of empty pesticide containers	60
6.8	Sharing knowledge and information with other farmers	61
6.9	Farmers information source on vegetable production	62

6.10	Number and percentage of extension officer had visited and farmer activities with extension program	63
6.11	Number and percentage of farmers had borrowed loan in study area	64
6.12	Number of farmer better knowledge after participation in training course	65
6.13	Percentage of farmer indicated improvement of management practice through IPM/FFS approach	66
6.14	Farmers' perception and need in extension program	67
6.15	Important factors contributing to success of dissemination as seen by extension staff and farmers had project area in two villages with extension program	69
6.16	Critical problems as perceived by vegetable farmer in non-project village (Chroy Thore village)	69

## LIST OF FIGURES

<b>Figure</b>		<b>Page</b>
1.1	The composition of crop production in agriculture sector	3
3.1	Map of selected area, Kandal, Somroung Thom commune	19
4.1	Map of study area, Somroung Thom commune, Kien Sray district	24
4.2	Rainfall distribution of study area in Kien Sevey district	25
4.3	Land used in Somroung Thom commune	27
4.4	Cropping per year in three villages of Somroung Thom commune	33
4.5	Type of vegetable planted in study area	33
5.1	Pesticide application rate g per ha in three villages	44
5.2	Fertilizer application rate kg per ha in three villages	45
6.1	Organization structure of government system in Cambodia	49
6.2	Organization structure of non-government organizations system in Cambodia	51
6.3	Organization structure of farmer to farmer system in Cambodia	53
