## ACKNOWLEDGEMENTS

Thanks to the Thailand Research Fund (TRF) for providing financial support to carry out this research, grant number RDG51O0004-DSSPHD/001/2551, and thanks Prof. Gerrit Hoogenboom and the staffs of the Department of Biological and Agricultural Engineering, University of Georgia, and AgWeatherNet, Washington State University, 24106 North Bunn Road, Prosser, Washington 99350-8694, USA, for providing me advise and much support on computer and stationary facility. I would like to thank Prachin Buri Rice Research Center, Rice Department for generous support to conduct field experiment during 2009-2010.

Finally, I would like to give thanks to my parents, and my family, who gave me encouragement, patience, and sacrifice, which are the source of inspiration and motivation to complete my thesis.
