## ACKNOWLEDGEMENTS

The author wants to express special thanks to following persons:

Prof. Dr. C. P. W. Zebitz for his investment, ideas and professional instructions

Dr. Yaowaluk Changbang for her investment and willingness to be a part of this thesis project

S. Gerken for the many hours spend in preparation of thesis, the intense laboratory work and her encouraging words

Dr. E. Hummel and the Trifolio-M GmbH for entrusting me with this work and all the support and comments received

Dr. F. Walker for his help and explanation concerning the HPLC-MS analysis

B. Langford for her practical help on various occasions

S. & B. H. Stürenburg for their late night share of thoughts and professional help

N. Langewiesche for her help and statistical explanations

Our SAIWAM coordinator Puifai for all her help and encouragement

My family for their supportive prayers, patience and encouragements, especially my brothers Marc (for his prayers) and Boris for his conceptual thoughts and review of thesis chapters

My daughter Liara for her smile which kept me going

My best friend and his wonderful spirit, leading me through life
