ACKNOWLEDGEMENTS

The author wishes to express sincere gratitude and appreciation to Assoc. Prof. Dr. Watchara Kasinrerker, thesis advisor, for his excellent guidance, continuous discussion and vast knowledge. Without his support and encouragement, this thesis could not be accomplished.

I would like to offer my special thanks to my co-advisor Dr. Sawitree Chiampanichayakul and all examining committee for their kindness suggestions and valuable advice.

I would like to express my sincere thanks to all staff members of Assoc. Prof. Dr. Watchara Kasinrerker's laboratory and the Department of Clinical Immunology, Faculty of Associated Medical Sciences, Chiang Mai University, for their kind help. Many thanks are also extended to all of my friends for their help and warm friendship.

Finally, I would like to express my great gratitude to my parents and my relative for their love and encouragement throughout this study.

This work was supported by The National Center for Genetic Engineering and Biotechnology (BIOTEC) of the National Science and Technology Development Agency and The Thailand Research Fund.

Siriporn Kritratanasak
