ACKNOWLEDGEMENTS

I wish to express my sincere gratitude and appreciation to Asst. Prof. Dr. Wasna Sirirungsi, thesis advisor, for her excellent guidance, continuous discussion and suggestions throughout this study.

My gratitude is extended to Dr. Krauvan Balachandra of the Department of Medical Sciences, National Institute of Health, Ministry of Public Health, Thailand for providing the HCMV (AD169) DNA control.

I wish to thank Asst. Prof. Dr. Somsanguan Ausayakhun and Asst. Prof. Dr. Kessara Pathanapitoon of the Department of Ophthalmology, Prof. Dr. Dusit Lumlertgul, Nephrology Division, Department of Internal Medicine, Faculty of Medicine, and all staff members of the Kidney Transplantation Unit, Maharaj Nakorn Chiang Mai Hospital, for their kind help in specimen collection.

I would like to thank all staff members and Master degree students at the Department of Clinical Microbiology, Faculty of Associated Medical Sciences, Chiang Mai University, for their kind help and valuable advice.

I also wish to express my gratitude to my parents and the other members of my family for their love and encouragement throughout this study.

Finally, I thank the Department of Clinical Microbiology, Faculty of Associated Medical Sciences, Chiang Mai University for their support in providing instruments and a place to study, and the Faculty of Graduate Studies for allowing me to have this project investigated.
