<b>CHAPTER I: INTRODUCTION</b>	
1.1 Statement of problems	1
1.2 Literature reviews	5
1.2.1 Hemoglobins	5
1.2.2 The organization of the human $\alpha$ -globin gene cluster	6
1.2.3 Hemoglobin production	7
1.2.4 The classification of thalassemia syndromes	9
1.2.4.1 Beta thalassemia ( $\beta$ -thalassemia)	10
1.2.4.2 Alpha thalassemia ( $\alpha$ -thalassemia)	10
1.2.4.2.1 $\alpha$ -thalassemia heterozygote	12
1.2.4.2.1.1 heterozygous $\alpha$ -thalassemia 1 ( $--/\alpha\alpha$ )	12
1.2.4.2.1.2 heterozygous $\alpha$ -thalassemia 2 ( $-\alpha/\alpha\alpha$ )	13

1.2.5 Hematological changes in $\alpha$ -thalassemias	15
1.2.6 The changing of hemoglobin Bart's levels	16
1.2.7 Hemoglobin analysis	16
1.2.7.1 Screening techniques	18
1.2.7.1.1 Complete blood count (CBC)	18
1.2.7.1.2 One-tube osmotic fragility test (OF test)	19
1.2.7.2 Conventional confirmatory test	19
1.2.7.2.1 Hb H inclusion bodies	20
1.2.7.3 Instrumental techniques	21
1.2.7.3.1 Electrophoresis	21
1.2.7.3.2 High performance liquid chromatography (HPLC)	21
1.2.7.4 Extensive analysis technique	22
1.2.7.4.1 DNA analysis	22
1.3 Production of monoclonal antibody	23
1.4 Objectives	26

## CHAPTER II: MATERIALS AND METHODS

2.1 Chemicals and instruments used in this study are shown in Appendix A	27
2.2 Characterization of monoclonal antibodies against hemoglobins	27
2.2.1 Hemolysate preparation	27
2.2.2 Characterization of monoclonal antibodies against hemoglobins by indirect ELISA	28

2.3 Single cell cloning	28
2.4 Determination of isotype of monoclonal antibodies	29
2.5 Large scale production and purification of monoclonal antibodies	29
2.5.1 Production of ascitic fluid	29
2.5.2 Purification of Thal GJA and Thal N/B monoclonal antibodies by AKTA™ prime automated liquid chromatography system	30
2.6 Determination of hemoglobin Bart's by sandwich ELISA	30
2.6.1 Labeling of Thal N/B with horseradish peroxidase (HRP)	30
2.6.2 Determination of HRP-conjugated Thal N/B anti-hemoglobin mAb activity	31
2.6.3 Optimization of Sandwich ELISA for detection of hemoglobin Bart's in blood sample hemolysate	31
2.6.4 Determination of specificity and sensitivity the developed sandwich ELISA	32
2.7 Determination of hemoglobin Bart's in hemolysate by sandwich ELISA	33
2.7.1 Blood samples	33
2.7.2 Identification of $\alpha$ -thalassemia by PCR analysis	33
2.7.2.1 DNA preparation	34
2.7.2.2 Detection of $\alpha$ -thalassemia 1 (SEA type) by PCR analysis	35
2.7.2.3 Detection of $\alpha$ -thalassemia 2 by PCR amplification	37

2.7.3 Detection of Hb Bart's in blood samples by the developed sandwich ELISA	40
-------------------------------------------------------------------------------	----

2.7.3.1 Blood sample preparation	40
----------------------------------	----

2.7.3.2 Detection Hb Bart's in blood sample by sandwich ELISA	40
---------------------------------------------------------------	----

### **CHAPTER III: RESULTS**

3.1 Characterization of monoclonal antibodies against hemoglobins	41
-------------------------------------------------------------------	----

3.2 Determination the activity and specificity of purified monoclonal antibodies against hemoglobins	43
------------------------------------------------------------------------------------------------------	----

3.3 Detection of hemoglobin Bart's in blood samples by Sandwich ELISA	45
-----------------------------------------------------------------------	----

3.3.1 Preparation of HRP conjugated mAb Thal N/B	45
--------------------------------------------------	----

3.3.2 Development of method for determination of hemoglobin	47
-------------------------------------------------------------	----

Bart's by sandwich ELISA using mAbs Thal GJA and HRP-labeled Thal N/B

3.4 Determination of specificity and sensitivity of hemoglobin Bart's of the developed sandwich ELISA	50
-------------------------------------------------------------------------------------------------------	----

3.5 Evaluation of the developed sandwich ELISA for quantification of hemoglobin Bart's in thalassemia hemolysate	52
------------------------------------------------------------------------------------------------------------------	----

3.5.1 Screening for thalassemia heterozygotes	52
-----------------------------------------------	----

3.5.1.1 Blood samples	52
-----------------------	----

3.5.1.2 One-tube osmotic fragility test (OF test)	52
---------------------------------------------------	----

3.5.1.3 Hb H inclusion body test	53
----------------------------------	----

3.5.1.4 High Performance Liquid Chromatography analysis for $\beta$ -thalassemia	55
3.5.1.5 PCR analysis for $\alpha$ -thalassemia	57
3.5.1.5.1 Detection $\alpha$ -thalassemia 1 with the Southeast Asian deletion (SEA type) by using Gap-PCR analysis	57
3.5.1.5.2 Detection $\alpha$ -thalassemia 2 with 3.7 kb and 4.2 kb deletions by PCR analysis	59
3.5.1.6 Comparison of the one-tube osmotic fragility test and PCR test	62
3.5.1.7 Quantitation of hemoglobin Bart's by the developed sandwich ELISA	64
3.5.1.8 Quantitation of hemoglobin Bart's concentration per gram of hemoglobin	69
<b>CHAPTER IV: DISCUSSION AND CONCLUSION</b>	73
<b>REFERENCES</b>	82
<b>APPENDIX</b>	92
<b>CIRRICULUM VITAE</b>	101

## LIST OF TABLES

<b>TABLE</b>	<b>PAGE</b>
2.1 The reaction mixture of Gap-PCR for detection of $\alpha$ -thalassemia 1 SEA type	36
2.2 The PCR cycling condition for $\alpha$ -thalassemia 1 (SEA) using the Thermal cycler	37
2.3 The reaction mixture of PCR amplification for detection of $\alpha$ -thalassemia 2 with 3.7 and 4.2 kb	38
2.4 The reaction mixture of PCR amplification for detection of internal control	39
2.5 The PCR cycling condition for $\alpha$ -thalassemia 2 (3.7 and 4.2 kb deletions) using the Thermal cycler	39
3.1 Screening of 91 blood samples by OF Test using 0.36% buffered saline solution compared with PCR analysis	63
3.2 The results of developed sandwich ELISA for Hb Bart's in different categories	66
3.3 The results of developed sandwich ELISA for Hb Bart's per gram hemoglobin in different categories	71

## LIST OF FIGURES

FIGURE	PAGE
1.1 Hemoglobin molecule	6
1.2 Organization of $\alpha$ -globin gene cluster	7
1.3 Sequence of globin chain synthesis in the embryo and fetus throughout the first year of life	8
1.4 Duplicated XYZ box arrangement containing the $\alpha$ genes	14
1.5 Misaligned chromosomes crossing over to produce $\alpha$ -thalassemia	15
1.6 Monoclonal antibodies production	25
2.1 Demonstration of diagram normal $\alpha$ -globin-like-gene cluster and $\alpha$ -thalassemia 1 (SEA)	36
2.2 Demonstration of 3 pairs of primer amplify PCR product with 1779, 1529 and 1395	38
3.1 Determination of the specificity of Thal GJA and Thal N/B monoclonal antibodies	42
3.2 Specificity of purified mAbs Thal GJA and Thal N/B by indirect ELISA	44
3.3 Activity of HRP-conjugated purified mAb Thal N/B in the presence or absence of sodium azide preservative	46
3.4 The optimal concentration of Thal GJA and HRP-conjugated Thal N/B mAb for detection of Hb Bart's in hemolysate by developed	48

sandwich ELISA	
3.5 The optimal concentration of Thal GJA and Thal N/B-HRP to detect Hb Bart's in hemolysate was determined	49
3.6 Specificity and sensitivity of the developed sandwich ELISA	51
3.7 Hb H inclusion bodies screening in $\alpha$ -thalassemia 1 heterozygote by modified BCB method	54
3.8 Three representative types of HPLC chromatograms from blood samples	56
3.9 PCR analyses for $\alpha$ -thalassemia 1 Southeast Asian deletion type	58
3.10 PCR analyses for $\alpha$ -thalassemia 2 with 3.7 kb deletions	60
3.11 PCR analyses for $\alpha$ -thalassemia 2 with 4.2 kb deletions	61
3.12 The representative standard curve of purified Hb Bart's concentrations was determined by developed sandwich ELISA	67
3.13 Comparison between PCR analysis and developed sandwich ELISA to identify $\alpha$ -thalassemia in 91 blood samples	68
3.14 Quantitation of Hb Bart's concentration in total hemoglobin concentration to identify $\alpha$ -thalassemia in 91 blood samples	72

## ABBREVIATIONS AND SYMBOLS

$\alpha$	Alpha
$\beta$	Beta
$\delta$	Delta
$\varepsilon$	Epsilon
$\gamma$	Gamma
$A\gamma$	A gamma
$G\gamma$	G gamma
$\psi$	Pseudogene
$\theta$	Theta
$\zeta$	Zeta
BSA	Bovine Serum Albumin
$^{\circ}\text{C}$	Degree celsius
CBC	Complete Blood Count
CV	Coefficient of Variation
EDTA	Ethylenediaminetetracetic acid
ELISA	Enzyme-linked immunosorbent assay
hr	Hour
HRP	Horseradish peroxidase
IgA	Immunoglobulin A
IgG	Immunoglobulin G

IgM	Immunoglobulin M
Igs	Immunoglobulins
IMDM	Iscove's Modified Dulbecco's Medium
kb	Kilobase
kDa	Kilo Dalton
L	Litre
M	Molarity
mAb	Monoclonal antibody
mg	Milligram
min	Minute
ml	Milliliter
mM	Millimolar
nm	Nanometer
OD	Optical Density
PBS	Phosphate Buffer Saline
%	Percent
pH	Power of hydrogen
rpm	Round per minute
$\mu$ g	Microgram
$\mu$ l	Microliter
