ACKNOWLEDGEMENTS

I would like to express my deepest gratitude and sincere appreciation to my advisor, Assoc. Prof. Dr. Chatchai Tayapiwatana for his moral support, advice, valuable suggestion, enthusiastic encouragement throughout my study, and for the reversion of this thesis.

I am also extended my grateful to Prof. Dr. Watchara Kasinrerak for his valuable, kind advice and knowledgeable comments, and for providing antibodies and laboratory facilities.

I would like to especially thank Asst. Prof. Khajornsak Tragoolpua for his advice, consultant and kind help. I also would like to thank my dear friends, Miss Kuntida Kitidee for her consultant, Miss Pattama Klomporn for her kind help, Mr. Wutigri Nimlamool for his kind help and consultant, Miss Sawitree Nangola for her kind help, Mr. Somphot saoin for assistance and friendship and Dr. Nutjeera Intasai for English proving in this thesis. I am also grateful to all personnel and faculty members in Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University for their kindness, assistance and friendship.

I am thankful to the financial support from the National Center for Genetic Engineering and Biotechnology.

Finally, I would like to express my deepest appreciation to my parents for their love and encouragement during this study.

Prakitnavin Pingmuang
