ACKNOWLEDGEMENTS

First, I would like to thank my advisor Assoc. Prof. Werawan Ruangyuttikarn, for her continuous support in the Ph.D. program. Assoc. Prof. Werawan was always there to listen and give advice. She showed me different ways to approach a research problem and the need to be persistent to accomplish any goal.

I also thank Assoc. Prof. Muneko Nishjo, Prof. Ryumon Honda, Prof. Hidetoyo Teranishi, Prof. Hideaki Nakagawa and Kanazawa Medical University, Ishikawa, Japan for laboratory training support.

I would like to extend my appreciation to Assoc. Prof. Prachya Kongtawelert for his valuable suggestion in molecular laboratory technique

This thesis could not be completed without guideline of Assoc. Prof. Dr. Samlee Mankhetkorn and Assist. Prof. Dr. Yuttana Munde

Very special thanks go to Dr. Wittaya Sawaddiwudhipong, Ms. Pranee Mahasakphan and her medical personnels for their kind contribution during the survey.

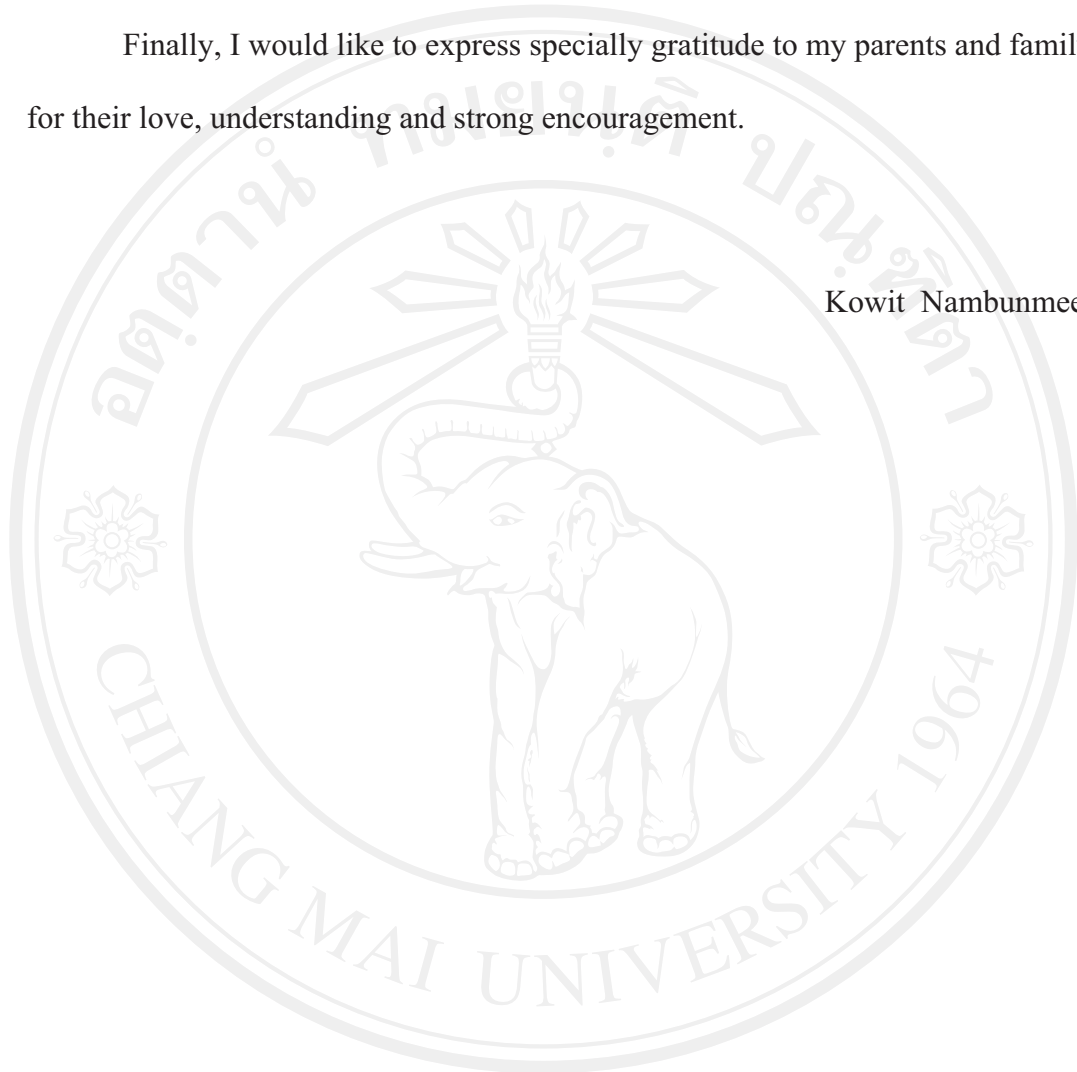

A special thank goes to Dr. Peraphan Pothacharoen and Miss Orawan Wanacheewin for their kind and excellent training on hFOB cell culture and gene expression technique.

I would like to thanks all of inhabitants in Amphur Mae Sot, Tak Province for their excellent cooperation and also thanks my friends at the Faculty of Associated Medical Sciences and Faculty of Medicine, Chiang Mai University for their warm friendship.

My Ph.D study funded by the Strategic Scholarship for Frontier Research
Network of the Commission on Higher Education, Thailand.

Finally, I would like to express specially gratitude to my parents and family
for their love, understanding and strong encouragement.

Kowit Nambunmee
