ACKNOWLEDGEMENTS

I would like to extend my sincere gratitude to my advisor, Kowit Poolsin for his supervision, valuable advice and proof of this thesis.

I wish to express my thanks to Faculty of Dentistry, Chiang Mai University for using incubator, supplying the methylene blue and bonding procedure; Faculty of Agriculture, Chiang Mai University for permission and helpful comments on the section of Instron testing machine; Department of Geological Sciences, Faculty of science, Chiang Mai University for using stereozoom microscope; Sermuk Buochareon, Head of Metal Technology Division, Rajamangala Institute of Technology, Northern Campus for his valuable suggestions of instrument construction; Assistant Professor Aunnop Koonphandh, the Educational Measurement and Evaluation Department of Faculty of Education for his reliable advices in the design and interpretation for the statistical analysis.

I gratefully acknowledge the cooperation of Ormco Corporation in providing commercial products for supplying the materials (System 1+) used in this study.

I would like to thank my colleagues and my friends for their assistances.

My special thanks is extended to my parents for continuous encouragement and support.

Jantima Ariyanon
