ABSTRACT (THAI)  vi
LIST OF TABLES  x
LIST OF FIGURES  xii
CHAPTER I  INTRODUCTION  1
  1.1 Rationale  1
  1.2 Objectives  5
  1.3 Hypotheses  5
  1.4 Anticipated benefits  5
CHAPTER II  LITERATURE REVIEW  6
  2.1 Embryology  6
    2.2 Genetic and environmental cause of clefts  10
    2.3 One-stage closure of cleft lip and palate  12
    2.4 Two-stage closure of cleft lip and palate  13
    2.5 One-stage closure and two-stage closure of cleft lip and palate  14
    2.6 Timing of hard palate closure  17
CHAPTER III  MATERIALS AND METHODS  20
  3.1 Materials  20
### 3.1.1 Samples

20

#### 3.2 Methods

24

3.2.1 Dental model analysis
24

3.2.1.1 Anterior and posterior arch widths
24

3.2.1.2 Anterior overjet
26

3.2.1.3 Anterior overbite
26

3.2.1.4 Anterior and posterior crossbites
27

3.2.2 Statistical methods
28

3.2.3 Errors of assessment
29

3.2.3.1 Errors of measurement
29

3.2.3.2 Errors of method
29

LIST OF TABLES

Table  Page
1  Usual treatment sequence  11
2  Guideline of treatment in patients with cleft lip and palate  12
3  Comparison of outcomes of one-stage and two-stage treatments.  15
4  Number of subjects in one-stage and two-stage groups, and mean ages at time of impression-taking  20
5  Timing of lip and palate closure (age in months, mean ± standard deviations)  21
6  Surgical techniques for palate closure  22
7  Surgical technique for lip closure  22
8  Distribution of subjects with unilateral cleft lip and palate  30
9  Comparison of dental model measurements in two groups  32
10 Comparison of posterior crossbite in small lateral jaw segment and large jaw segment in two-groups  33
11 Comparison of anterior and posterior crosbies in two groups  33
12 Comparison of the first and second measurements between the intrainvestigator  55
13 Raw data of one-stage closure (Group 1)  56
14 Raw data of two-stage closure (Group 2)  57
15 Crossbite evaluation of the one-stage closure group (Group 1)

1. Cleft lip and palate children
2. Facial development in the embryo
3. Non-syndromic orofacial clefts
4. SNA and SNB angles
5. Triangular flap (Tennison) unilateral cleft lip surgery, A is cutting design for the unilateral cleft lip surgery and B is final flap positioning after cutting for the unilateral cleft lip surgery
6. Flap design (A) of Veau-Wardill-Kilner repair used lateral releasing incisions to allow medial movement of the palatal mucosa; the technique preserved the greater palatine vessels and the anterior incisive pedicle (B)
7. Analysis of anterior and posterior arch widths
8. Overjet measurement
9. Overbite measurement
10. Digital caliper
11. Method for the evaluation of the occurrence of crossbite according to Huddart and Bodenham
12. Comparison of anterior arch width, posterior arch width, anterior overjet and anterior overbite: one-stage closure versus two-stage closure
13. Evaluation of overjet in one-stage and two-stage closures
