## ACKNOWLEDGEMENT

I would like to acknowledge the Ministry of University Affairs on providing the scholarship for the study in health sciences program, Graduate school, Chiang Mai University.

I would like to express my deepest sincere gratitude to my supervisor, Dr. Pathawee Khongkhunthian, Faculty of Dentistry, Chiang Mai University, who always provides me guidance and encouragement.

I also gratefully acknowledge to Associate Professor Dr. Suvichai Rojanasthien, my co-supervisor, for his excellent encouragement.

The completion of this thesis would not have been possible without the support from Professor Dr. Peter A. Reichart, who let me spend a good period of time in Humboldt University, Germany, performing histological evaluation.

I would like to give my sincere appreciation to one of my examining committee, Associate Professor Dr. Ted Tesprateep, who provides me useful advice and guide me to complete this thesis.

I deeply thank all staffs of the Department of Small Animal Clinic, the Faculty of Veterinary Medicine, Chiang Mai University for their kindness and friendship. Also,

gratefully thank all staffs of Research Center, the Faculty of Dentistry, Chiang Mai University.

I also would like to express my sincere appreciation to my father and my mother, who always cheer me up.

Finally, I would like to thank all the laboratory animals that passed through my hands, leaving me more experienced to better care for those who would follow.
