ACKNOWLEDGEMENT	iii
ENGLISH ABSTRACT	iv
THAI ABSTRACT	vi
LIST OF TABLES	x
LIST OF ILLUSTRATIONS	xii
LIST OF ABBREVIATIONS	xiii
CHAPTER 1 INTRODUCTION	1
Introduction	1
Objective	4
Educational advantages	4
CHAPTER 11 LITERATURE REVIEW	5
The principle of milking machine	5
The principle of bovine teat	13
The principle of somatic cell count	17
The principle of ultrasound	18

	Page
CHAPTER 111 MATERIAL AND METHODS	23
Research scope and methods	23
Experimental design	28
Sample size	28
Statistical analysis	29
Location of research operation and data collection	31
CHAPTER IV RESULTS	32
The effects of milking machine on quarter somatic cell count	32
The effects of teat structures on quarter somatic cell count	35
The effects of individual cow management and farm management on quarter somatic cell count	45
CHAPTER V DISCUSSION	52
The effects of milking machine on quarter somatic cell count	52
The effects of teat structures on quarter somatic cell count	56
The effects of individual cow management and farm management on quarter somatic cell count	60
Conclusion	69
REFERENCES	70
APPENDIX A The terms related with the pulsator	80
APPENDIX B The check list for collect the data	82
VITA	86

LIST OF TABLES

Table	Page
1. The descriptive statistic of milking machine performance	33
2. Comparison of milking machine performances between farms with high and low somatic cell count	34
3. The characteristics of teat structures	36
4. Comparison of the teat structures at <i>before</i> milking between high and low somatic cell count	37
5. Comparison of the teat structures at <i>after</i> milking between high and low somatic cell count	38
6. Comparison of teat canal length, teat diameter, teat cistern width and teat wall thickness in milking cows between <i>before and after</i> milking.	39
7. The mean difference and standard error of teat canal length, teat diameter, teat cistern width and teat wall thickness between before and after milking with the teat end score	42
8. The teat end score changing between before attachment and after detachment of the teat cup	43
9. The descriptive statistic and significant difference between log of quarter somatic cell count and teat end score after detach teat cup	44

Table	Page
10. Comparison of individual cow management data between high and low somatic cell count	47
11. The percentage and comparison of categorical farm management data between high and low somatic cell count	48
12. The comparison between log somatic cell count and typing barns in small holder dairy farms in the northern of Thailand.	51

LIST OF ILLUSTRATIONS

Figure	Page
1. The bucket type of milking machine system	12
2. The bovine teat anatomy	16
3. The Real-Time B mode scanners and their compartments	22
4. The measurement of teat structures	25
5. The teat ultrasonographic method	26
6. The teat end scoring system	27
7. Comparison of teat ultrasonography between before and after milking	40

LIST OF ABBREVIATIONS

ANOVA	analysis of variances
BMSCC	bulk milk somatic cell count
CFM	cubic feet per meter
CIP	clean in place
CMT	California mastitis test
DIM	day in milk
FAO	The Food and Agriculture Organization of the United Nations
IMI	intramammary infection
ISO	international standards organization
kPa	kilopascal
MHz	megahertz
NaOH	sodium hydroxide
PMN	polymorphonuclear
QSCC	quarter somatic cell count
SCC	somatic cell count
S.D.	standard deviation
TCL	teat canal length
TW	teat width
TCW	teat cistern width
TWT	teat wall thickness
