ACKNOWLEDGEMENTS

First of all, I would like to express my sincere gratitude to Professor Thira Sirisanthana, the Director of the Research Institute for Health Sciences, for his kindness, encouragement and giving the opportunity for me to study.

I would like to appreciate to the Fogarty AIDS International Training and Research Program, the Johns Hopkins University for giving a scholarship to undertake the Master degree of Science (Health Sciences) at Chiang Mai University.

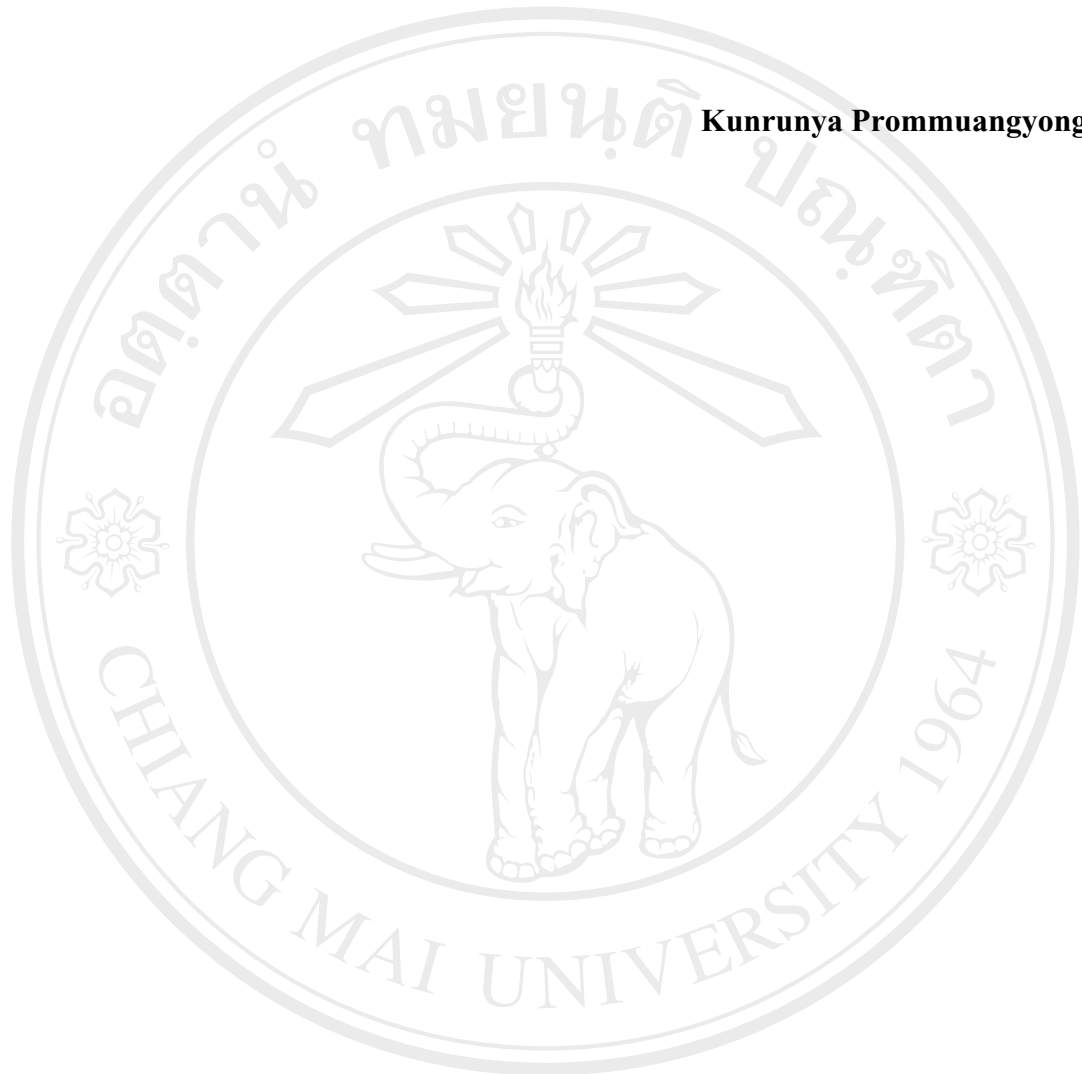

I am also grateful to Dr. Sukanya Linpisarn, advisor, Dr. Sakda Prunglampoo and Assoc. Prof. Ampica Mangklabruks, co-advisor for their advice and valuable suggestions throughout study.

My special thanks to Mrs. Wilai Kotarathitum and Miss Jutarat Praparattanapan, Department of Medicine, Faculty of Medicine and staffs of the Central laboratory and Blood Bank of Maharaj Nakorn Chiang Mai Hospital, Chiang Mai Province for their support in subject's enrollment.

I would like to thank Mrs. Yupin Chromwinya, Immunology Department of Microbiology, Faculty of Medicine, Chiang Mai University for her help about data of CD4+ T cell count.

I sincerely thank to Mrs. Somluck Nimsakul, Mr. Tawatchai Kamlin, Mrs. Prostri Leelapat, Miss Surangjit Kottathep and Dr. La-aied Prapanthadara for their help throughout this thesis.

Finally, I would like to give my special thanks to my family and my friends for their love and morale.
