

Independent Study Title	Good Manufacturing Practice for Instant Longan Drink Powder
Author	Miss Rawipun Jawunna
Degree	Master of Science (Food Science and Technology)
Independent Study Advisor	Assoc. Prof. Ratana Attabhanyo

ABSTRACT

The objective of this independent study was to develop good manufacturing practice for instant longan drink powder. Khunnumtha Processing Co.,Ltd., Ton Pung and Tha Klang were selected for the study. The data were collected and analyzed using Thai FAD's check list, to find non-compliances in practice against Thai GMP regulations.

The survey results showed that there were many non-compliances according to the regulations. The non-compliances ranked from the most severe items were, plant and ground, manufacturing control, sanitary operation, cleaning and maintenance, personnel, and equipment and utensils. In addition, transportation and staff training were not complied to the regulations. Therefore, the GMP for Instant Longan Drink Powder was developed specifically for plant and ground, manufacturing control and equipment and utensils.
